About this Directory

The 2016- 2017 Directory: Health Policy, Leadership, and Minority Health Training Programs describes institutional training and fellowship initiatives in the areas of health policy, minority health, public health leadership, and health services research, programs for health professionals, particularly minority health professionals. Data were collected through literature review, a survey of U.S. schools of public health and medical schools, web searches, and direct contacts with government agencies, schools of public health or public administration, schools of medicine, professional associations and foundations. In some cases, description of programs was excerpted from web sources or annual reports.

This directory has been prepared by the Commonwealth Fund Mongan Fellowship Program (formerly the Commonwealth Fund/Harvard University Fellowship in Minority Health Policy) and other fellowship programs within the Office for Diversity Inclusion & Community Partnership. While we have endeavored to include the most current information pertaining to association, foundation, government and academic institution sponsored programs, this compendium is by no means exhaustive. It should be recognized that all information in the directory is subject to revision and that, from time to time, changes in programs are made. For further information, please contact programs directly.
The Commonwealth Fund Mongan Fellowship in Minority Health Policy

The Commonwealth Fund Mongan Fellowship Program (formerly the Commonwealth Fund/Harvard University Fellowship in Minority Health Policy) is designed to prepare U.S. physicians for leadership roles in transforming health care delivery and promoting health policies and practices that improve access to high performance health care for vulnerable populations, including racial and ethnic minorities and economically disadvantaged groups. Up to four one-year, degree-granting fellowships will be awarded per year.

Moving toward a high-performance health care system requires trained, dedicated physician leaders who can transform health care delivery systems and promote policies and practices that improve access to high-quality care and health outcomes for vulnerable populations, including racial and ethnic minorities and economically disadvantaged groups. With the passage of the Affordable Care Act, it is more important than ever that the needs of vulnerable populations be represented by well-trained clinician leaders as the provisions of the new law are implemented. Since 1996, the Commonwealth Fund Mongan Fellowship Program has played an important role in developing physician leaders who will address the health needs of vulnerable populations.

Based at Harvard Medical School under the direction of Joan Reede, MD, MPH, MS, MBA, Dean for Diversity and Community Partnership, the year-long fellowship offers intensive study in health policy, public health, and management for physicians committed to transforming delivery systems for vulnerable populations. Fellows also participate in leadership forums and seminars with nationally recognized leaders in health care delivery systems, minority health, and public policy. Under the program, fellows complete academic work leading to a master of public health degree at the Harvard T. H. Chan School of Public Health.

By May 2016, a total of 102 fellows will have graduated from the program. Four physicians have been selected for the 2016-2017 fellowship program.

California Endowment Scholars in Health Policy at Harvard University
Introduction

Established in 2001 with the support of The California Endowment, the program is designed to prepare California’s outstanding physicians, dentists, and mental health providers, particularly underrepresented minority health professionals, for leadership roles in formulating and implementing public health policy in a multicultural and ethnically-diverse society. The California Endowment Scholars in Health Policy at Harvard University is a one-year, full-time, academic degree-granting program designed to create health professional leaders capable of advancing multicultural health interests in the public, nonprofit, and academic sectors. Scholars complete academic work that leads to a Masters in Public Health (MPH) at the Harvard T.H. Chan School of Public Health or a Masters in Public Administration (MPA) at the Harvard Kennedy School of Government. The Scholars program includes courses, seminar series, leadership forums, site visits, national conferences, shadowing of public health leaders and a supervised practicum.

Goals & Objectives

The purpose of The California Endowment Scholars in Health Policy program is to prepare health professional leaders, particularly underrepresented minority leaders, who will, over time, improve the capacity of the health care system to address the health needs of minority and disadvantaged populations in California. The program has the following goals:

- To provide strong academic training that leads to a Master’s degree in public health and/or in public administration.
- To provide advanced leadership and cultural competence training to scholars.
- To create a network of health professional leaders capable of advancing multicultural health interests in the public, nonprofit, and academic sectors.
- To connect scholars with Harvard senior faculty and California-based professional mentors.
- To provide program graduates with first-hand experience with grantees of The Endowment in the areas of cultural competence, health disparities, health workforce diversity, and access to health care, allowing them to integrate training with practical application in a real-world setting.
- To bring together the faculty and resources of Harvard Medical School, Harvard School of Dental Medicine, Harvard School of Public Health, and the Harvard Kennedy School of Government to provide an enhanced curriculum that addresses issues of health policy and public health practice and multiculturalism.

Please note: the program is not accepting applications for the 2016-2017 year.

Requests for further information about the California Endowment Scholars program and/or application materials should be addressed to:

Joan Y. Reede, MD, MPH, MBA
The Joseph L. Henry Oral Health Fellowship in Minority Health Policy

The Joseph L. Henry Oral Health Program is supported by the Dental Service of Massachusetts/Delta Dental Plan and previously the Health Resources and Services Administration (HRSA) through a cooperative agreement between the Office of Minority Health and Minority Faculty Development Program at Harvard Medical School. The Oral Health Program is an academic degree-granting program, designed to create oral health leaders, particularly oral health leaders from groups underrepresented in medicine, who will pursue careers in health policy, public health practice and academia. The program is intended to incorporate the critical skills taught in schools of public health, government, business, and dental medicine with supervised practicum, leadership forums and seminar series conducted by leading scholars and nationally recognized leaders in minority health and public policy.

The program is designed to prepare oral health leaders who will, over time, improve the capacity of the health care system to address the health needs of minority and disadvantaged populations. To accomplish this, the program will:

- Provide strong academic training, including a graduate degree, for highly qualified dentists.
- Enhance the leadership ability of dentists, offering them substantive knowledge in health policy and management, while creating a network of oral health leaders capable of advancing successfully among the public, non-profit, and academic sectors.
- Provide each fellow with mentoring by Harvard senior faculty and administrators and access to national leaders in oral health, health policy and public health practice.
- Provide firsthand experience in private and public sectors, allowing the fellows to integrate academic leadership training with its practical application in a real world setting.
- Bring together the faculty and resources of Harvard Medical School, Harvard School of Dental Medicine, Harvard School of Public Health, and the John F. Kennedy School of Government to provide an enhanced curriculum that addresses issues of public health, oral health, health policy, and practice — particularly as they relate to minority health issues.
- Utilize resources at Harvard Medical School, Harvard School of Dental Medicine, including the offices of Minority Faculty Development Program, to enhance the networking, career development, and career advancement of participating fellows.
The requirements for Fellows of the Joseph L. Henry Oral Health Fellowship in Minority Health Policy are to complete the course work leading to a graduate degree from the Harvard T.H. Chan School of Public Health. The Program includes courses, seminars, leadership forums, a research practicum, site visits and mentoring by senior faculty and public health leaders.

Qualifications:

- DDS or DMD and an active dental license required
- Experience with addressing and improving needs of minority, disadvantaged and vulnerable populations
- Interest in minority health, public policy and public health
- U.S. citizenship or permanent US residency

AcademyHealth

AcademyHealth
1150 17th Street NW, Suite 600
Washington DC 20036
www.academyhealth.org

NCHS/AcademyHealth Health Policy Fellowship
http://academyhealth.org/Training/content.cfm?ItemNumber=1435

Each year, up to two individuals may be selected as fellows to conduct their research and work collaboratively with NCHS staff on joint projects of mutual interest while in residence at NCHS in Hyattsville, Maryland, for a period of 13 months to conduct studies of interest to policymakers and the health services research community. Fellows have access to NCHS data resources for use in their proposed studies, and also work on collaborative projects with NCHS staff. The aim of the fellowship is to foster collaboration between NCHS staff and visiting scholars on a wide range of topics of mutual concern. The 13 month fellowship allows visiting scholars to conduct new and innovative analyses and participate in developmental and health policy activities related to the design and content of future NCHS surveys.

Delivery System Science Fellowship
http://www.academyhealth.org/Training/content.cfm?ItemNumber=13412&navItemNumber=9884

The U.S. health system has dramatically evolved over the last few years – train with leading delivery systems using evidence to improve health and the performance of the health system. AcademyHealth's Delivery System Science Fellowship offers a year-long learning opportunity for highly-qualified, post-doctoral researchers to gain more applied experience in a delivery system setting. As part of this unique fellowship experience, individuals with a background in health services research or related fields are placed within leading delivery systems to apply and enhance their analytic skills and obtain hands-on training and professional development opportunities. Practice areas and roles at the specific host sites will depend on the Fellows' experience and areas of interest, as well as institutional special interests. Please visit the DSSF Host Site webpage to learn about the unique professional development opportunities offered by each host site.

American Association for the Advancement of Science (AAAS)

AAAS Science & Technology Policy Fellowships
1200 New York Avenue, NW
Washington, DC 20005
E-mail: fellowships@aaas.org
The science and engineering challenges that society faces today—locally, nationally and internationally—are far more complex than were those of 40 to 50 years ago. The problems now are more difficult to define and the solutions more difficult to identify and implement. The best available scientific, technical and economic information is required to establish priorities, make decisions, and develop best policies and practices. Yet, scientists often lack the skills and opportunity to apply their science successfully to support policy or to communicate effectively with the public and other non-academic audiences. To address these challenges, The American Association for the Advancement of Science manages and administers Science & Technology Policy Fellowships in five program areas to provide the opportunity for accomplished scientists and engineers to participate in and contribute to the federal policymaking process while learning firsthand about the intersection of science and policy. The fellowships in congressional offices are funded by approximately 30 partner scientific and engineering societies. The fellowships in executive branch agencies are funded by the hosting offices. The fellowships are highly competitive and use a peer-review selection process. Review is followed by individual interviews in Washington, DC, conducted by selection committees comprised of professionals with expertise in the interface of science, technology, and policy. Learn more information about the selection and placement process. Following selection, Fellows come to Washington, DC, in September of each year and participate in a comprehensive orientation program before beginning their fellowships in the various sectors of government. AAAS also conducts a professional development program throughout the year. The fellowship programs have several basic requirements in common. Applicants must have a PhD or an equivalent doctoral-level degree at the time of application. Individuals with a master’s degree in engineering and at least three years of post-degree professional experience also may apply. Some programs require additional experience. Applicants must be U.S. citizens. Federal employees are not eligible for the fellowships.

American Association of Colleges of Osteopathic Medicine (AACOM)

Nancy Cooper  
Program Coordinator  
Department of Social Medicine  
Ohio University Heritage College of Osteopathic Medicine  
307 Grosvenor Hall  
Athens, OH 45701  
coopern@ohiou.edu

Health Policy Fellows  
https://www.ohio.edu/medicine/education/graduate-education/fellowship-programs/health-policy/index.cfm

The Health Policy Fellowship is designed for practicing or teaching osteopathic physicians who are preparing for leadership roles in the profession and positions of influence in health policy, and for individuals with a professional connection to the osteopathic profession. Health Policy Fellows attend an intensive five-day academic orientation before entering the regimen of nine three-day weekend seminars. Seminars are rotated among osteopathic colleges and the
Washington, DC area offices of the American Association of Colleges of Osteopathic Medicine (AACOM) and the American Osteopathic Association (AOA). Between monthly seminars, Fellows are expected to complete reading, research and writing assignments. The New York Institute of Technology College of Osteopathic Medicine and the Ohio University Heritage College of Osteopathic Medicine coordinate this certificate program in health policy through a collaboration of AOA, AACOM and AACOM member colleges. 2015 to 2016 fellowship is already in progress and the website does not yet indicate another application cycle.

**American Association of Health Plans (AAHP)**

American Association of Health Plans (AAHP) Foundation  
The Executive Leadership Programs (ELP)  
601 Pennsylvania Ave, NW  
South Building  
Suite 500  
Washington, D.C. 20004

**Executive Leadership Programs**  
[http://www.ahipfoundation.org/elpmd.html](http://www.ahipfoundation.org/elpmd.html)

This year-long program integrates in-person sessions, a case study prepared by the Fellow and mentoring by a leader in a non-competing health insurance plan. The entire program focuses on the current health insurance environment as well as a longer-term view of the evolving system. Major areas of study throughout the year include: Leadership and Organizational Development, Executive Decision Making, Team Management and Communication Skills in High-Pressure Situations, Financial Management, Negotiation and Conflict Management, Strategic Planning, Health Insurance Systems, Health Policy Trends. The programs stand above general education programs as they're designed for the health insurance community, for health insurance professionals. In addition, the Kellogg School of Management at Northwestern University serves as the program's academic partner and setting for one of the academic sessions, reinforcing the outstanding education Fellows appreciate. Upon successful completion of the program, Fellows are recognized with the Certified Healthcare Insurance Executive (CHIE) designation—an endorsement of quality, comprehensive continuing education, and professional development. Recognized throughout the health insurance plan community, over 1,000 health care executives and medical directors hold this distinguished designation. 2015 to 2016 fellowship cycle is already in progress and the website does not yet indicate another application cycle.
American Enterprise Institute (AEI)

**AEI Internships**
https://aeiinternships.silkroad.com/

AEI internships provide students with an opportunity to work with some of America's most renowned scholars, economists, political scientists, and foreign policy specialists conducting research on today’s prominent public policy questions. Approximately forty-five internship opportunities are available in the fall, winter, and summer. Our internships can be categorized in the following overarching areas: economic policy, foreign and defense policy, social and political studies, public relations, The American online magazine, publications editing, marketing, government relations, and communications. Internship opportunities are available to undergraduates, graduate students, and postgraduates. Our internships are unpaid and the hours and days are flexible. AEI's internship program has repeatedly been included in the Princeton Review, Vault Guide to Internships, and the Random House Guide to Internships as one of the top 100 internships in the country.

American Federation for Aging Research (AFAR)

American Federation for Aging Research (AFAR)
55 West 39th Street, 16th Floor
New York, NY 10018
Email: grants@afar.org
http://www.afar.org

**AFAR Research Grants**
http://www.afar.org/research/funding

AFAR provides up to $100,000 for a one- to two-year award to junior faculty (M.D.s and Ph.D.s) to conduct research that will serve as the basis for longer term research efforts. AFAR-supported investigators study a broad range of biomedical and clinical topics including the causes of cellular senescence, the role of estrogen in the development of osteoporosis, the genetic factors associated with Alzheimer's disease, the effects of nutrition and exercise on the aging process, and much more. Since 1981, over 700 AFAR Research Grants have been awarded. Up to 10 awards will be given in 2016. The deadline for Letters of Intent is December 15, 2015.

American Hospital Association (AHA)

Health Research & Educational Trust
155 N. Wacker Drive, Suite 400
Chicago, IL 60606
E-mail: hpoe@aha.org

**AHA Health Care System Transformation Fellowship**
The Health Care Transformation Fellowship is an intensive, 9-month program to provide health care leaders with skills to help their organizations implement innovative delivery and payment system transformation models. The fellowship curriculum addresses a variety of health care transformation topics including: clinician alignment and leadership, new care delivery models, navigating financial risk in the volume-to-value transition, population health management, the integration of health information technology; and evolving partnerships with payers, employers, community organizations and other non-traditional partners.

**American Medical Association (AMA)**

American Medical Association  
AMA Plaza  
330 N. Wabash Ave.  
Chicago, IL 60611-5885  
Email: seedgrants@ama-assn.org

**Seed Grant Research Program**

The AMA Foundation established the Seed Grant Research Program in 2000 to encourage medical students, physician residents and fellows to enter the research field. The program provides grants to support medical students, physician residents, and fellows in conducting small research projects. With a generous contribution from Genentech, Inc., in 2016 the AMA Foundation will be awarding grants of up to $2,500 in the areas of cardiovascular/ pulmonary diseases and pancreatic cancer and $5,000 in the area of neoplastic diseases for small research projects.

**American Political Science Association (APSA)**

American Political Science Association  
1527 New Hampshire Ave  
NW Washington, DC 20036-1206  
E-Mail: apsa@apsanet.org

**APSA Congressional Fellowship Program**

http://www.apsanet.org/cfp

The American Political Science Association's Congressional Fellowship Program is a highly selective, nonpartisan program devoted to expanding knowledge and awareness of Congress. Since 1953, it has brought select political scientists, journalists, federal employees, health policy
specialists, and international scholars to Capitol Hill to experience Congress at work. The program lasts nine months, beginning in November and ending in mid-August. Fellows spend the month of November in an intensive orientation where they participate in daily seminars with policy specialists, congressional staffers, scholars, and journalists. After orientation Fellows work on a congressional staff of their choosing. Through this unique opportunity, the American Political Science Association enhances public understanding of policy-making and improves the quality of scholarship, teaching and reporting on American national politics.

American Psychological Association (APA)

American Psychological Association
750 First St. NE
Washington, DC 20002-4242

APA Congressional Fellowship Program
http://www.apa.org/about/awards/congress-fellow.aspx

Fellows spend one year working on the staff of a member of Congress or congressional committee. Activities may involve drafting legislation, conducting oversight work, assisting with congressional hearings and events, and preparing briefs and speeches. Fellows also attend a two-week orientation program on congressional and executive branch operations, which provides guidance for the congressional placement process, and participate in a yearlong seminar series on science and public policy issues. The American Association for the Advancement of Science (AAAS) administers these professional development activities for the APA fellows and for fellows sponsored by over two dozen other professional societies. APA and APF will each sponsor up to two congressional fellows for a one-year appointment beginning Sept. 1, 2016. The APA fellowship is open to all full APA members, but the APF fellowship was created to support psychologists with a background in developmental or clinical psychology and experience working directly with children. Stipends for these fellowships range from $75,000 to $90,000, depending upon years of post-doctoral experience. In addition, the fellowship provides reimbursement for health insurance coverage and a $3,750 stipend for professional development and relocation expenses during the fellowship year. Final selection of fellows will be made in early spring of 2016.

Catherine Acuff Congressional Fellowship
http://www.apa.org/about/awards/congress-fellow.aspx

Established by APA in 2000 to honor the memory of Catherine Acuff, PhD, and her many valued contributions to the field of psychology and to those it serves. Applicants for this fellowship must have five or more years of professional experience post-doctorate. The mid-career/senior focus of this program reflects Acuff’s transition to the public policy arena after many successful years in private practice and academia. Catherine Acuff, PhD, a dedicated psychologist, advocate and humanitarian, was a member of the APA Board of Directors when she died on Apr. 21, 2000, at age 51. The mid-career nature of this fellowship reflects Acuff's transition to the public policy arena, including advocacy for lesbian, gay and bisexual and HIV/AIDS issues, following
her successful career in private practice, on the faculty of local colleges and hospital-based clinical training programs, and as president of the Connecticut Psychological Association. At the time of her death, Acuff was the Director of the HIV/AIDS Treatment Adherence, Health Outcomes and Associated Costs Program for the Substance Abuse and Mental Health Services Administration in the U.S. Department of Health and Human Services.

**Postdoctoral MHSAS Fellowship**

Funded by a grant from the Substance Abuse and Mental Health Services Administration (SAMHSA), the MFP has created the Postdoctoral MHSAS fellowship to support the specialized training of early career doctoral recipients who have primary interests in services or policy related to the behavioral health or psychological well-being of ethnic minorities. The goal of the Postdoctoral MHSAS Fellowship Program is to encourage and facilitate the specialized training of postdoctoral psychologists. The program seeks to accomplish the following objectives: promote culturally competent behavioral health services and policy for ethnic minority populations, increase the number of ethnic minority psychologists providing behavioral health services and developing policy for ethnic minority populations. Applications are currently being accepted until January 15th, 2015.

**Psychology Summer Institute (PSI)**

The Psychology Summer Institute (PSI) provides educational, professional development and mentoring experiences to advanced doctoral students of psychology and psychologists who are in the early stage of their careers. Participants are guided toward developing a grant proposal, postdoctoral fellowship, dissertation, treatment program, publication or program evaluation project. All projects must focus on issues affecting ethnic minority communities. Participants will receive one-on-one mentoring on their projects by a consultant. Expert faculty will present seminars on selected topics such as grant writing, publishing and specific areas of research or service delivery. There will also be opportunities to network with representatives from federal agencies and foundations. Applications for the next program cycle begin January 31st, 2016.

**William A. Bailey Health and Behavior Congressional Fellowship**
http://www.apa.org/about/awards/congress-fellow.aspx

Established in 1995 to honor former APA staff member William (Bill) A. Bailey for his tireless advocacy on behalf of psychological research, training and services related to HIV/AIDS. Applicants for this fellowship should have a background in health and behavior issues, including HIV/AIDS; health disparities; or lesbian, gay, bisexual and transgender health issues. Bailey championed HIV/AIDS and lesbian, gay and bisexual policy issues for the APA as a member of the Public Policy Office staff. Among his many accomplishments, Bailey oversaw the development of a major report on behavioral and social sciences and the HIV/AIDS epidemic for the National Commission on AIDS, participated in the planning of an APA training program for psychologists who serve HIV-infected clients, facilitated the development of the AIDS community prevention programs supported by the Centers for Disease Control and Prevention,
forged collaborations between several government agencies to support the HIV/AIDS mental health services demonstration program, and successfully advocated for National Institute of Mental Health funding for research on anti-gay violence. An openly gay man who died from AIDS at the young age of 34, his legacy is one of great personal and professional strength.

**American Public Health Association (APHA)**

**APHA Public Health Fellowship in Government**

The APHA Public Health Fellowship in Government is designed to provide a unique public policy learning experience, to demonstrate the value of science-government interaction, and to make a contribution to enhancing public health science and practical knowledge in government. The overarching goals are to increase the capacity of public health professionals to inform the discussions and the decisions of the individuals and institutions that influence or determine policies and to provide relevant expertise and analysis to support decision-makers confronting increasingly complex issues. The fellowship aims to: establish and nurture critical links between federal decision makers and public health professionals; educate public health professionals about the legislative process and the skills necessary to be successful including the ability to translate complex public health issues into legislative, regulatory and policy initiatives; foster positive exchanges between public health professionals and policymakers; and increase the visibility and impact public health professional in the policy arena. New application is not yet available on the website.

**American Sociological Association (ASA)**

ASA Congressional Fellowship  
1430 K Street, NW Suite 600  
Washington, DC 20005  
spivack@asanet.org

**ASA Congressional Fellowship**

[http://www.asanet.org/funding/cf.cfm](http://www.asanet.org/funding/cf.cfm)

The ASA encourages applications for the Congressional Fellowship. The Fellowship brings a PhD-level sociologist to Washington, DC, to work as a staff member on a congressional committee or in a congressional office. This intensive twelve month (September to September) experience reveals the intricacies of the policy making process to the sociological fellow, and shows the usefulness of sociological data and concepts to policy issues. The website indicates the last application deadline as February 15th but does not show a year or whether the program still exists.
Aspen Institute

**Henry Crown Fellowship Program**

http://www.aspeninstitute.org/leadership-programs/henry-crown-fellowship-program

Each class of 20-22 Henry Crown Fellows is chosen from a wide pool of accomplished entrepreneurial leaders (between the ages of 30 and 45). These Fellows have already achieved considerable success in the private or public sector and are at an inflection point in their lives or careers—looking toward the broader role they might take on in their communities or globally. The two-year program is comprised of a structured series of four seminars (approximately 24 days in total) under the guidance of skilled senior moderators of the Aspen Institute along with a required leadership project of each Fellow’s own design and choosing. Seminars are held at the Aspen Institute campus in Aspen, Colorado, the Wye River facility on the Eastern Shore of Maryland, and at other locations around the world. Upon graduation from the two-year program, Fellows are invited to continue their engagement with members of their class, with other Henry Crown Fellows, with members of the Aspen Global Leadership Network and with various other aspects of the Aspen Institute. Individuals cannot apply for the Henry Crown Fellowship Program; they must be nominated by recognized leaders of the business and professional communities or by Fellows, Senior Mentors, and members of the Henry Crown Fellowship Board of Overseers or the Aspen Institute Board of Trustees.

**Association of Operating Room Nurses Foundation (AORN)**

Association of Operating Room Nurses (AORN), Inc.
2170 South Parker Rd, Suite 400
Denver, CO 80231

**Research Grant Program**

http://anfonline.org/NursingResearchGrant
http://www.nursingsociety.org/advance-elevate/research/research-grants

AORN advertises two different supporters for nursing research grants. The first, the American Nurses Foundation Nursing Research Grants Program, was founded almost 60 years ago to encourage the research career development of nurses. This program continues to grow with contributions for nursing research, from organizations and individuals. These donations support scientific research for advancing the practice of nursing, promoting health and preventing disease. Each year, through our Nursing Research Grants program, the American Nurses Foundation provides funds to beginner and experienced nurse researchers to conduct studies that contribute toward the advancement of nursing science and the enhancement of patient care. Listed below are the specific grants available. Some have research area requirements, and some require or give preference to membership in a specific nursing association. The online application is now available. All applications must be completed by 11:59 p.m. on May 1. The Honor Society of Nursing, Sigma Theta Tau also offers many different grant opportunities.
Association of Teachers of Preventative Medicine (APTR)

Association of Teachers of Preventative Medicine, Training Projects
Washington, DC  20036
http://www.atpm.org/prof_dev/fellowships.html

Paul Ambrose Scholars Program
http://www.aptrweb.org/?page=pasp

The Paul Ambrose Scholars Program prepares public health and clinical health professions students from across 8 health professions to address population health challenges at the national and community level. Since 2002, more than 550 students from over 200 academic institutions have become Paul Ambrose Scholars. This program seeks to meet the current and future health needs of the public by providing mini-grant funds to implement a Healthy People 2020 Leading Health Indicators project within a student's community or at their academic institution. Last application deadline was in April 2015. Website does not yet indicate an application for the next cycle.

Residency Rotations in Health Policy
http://www.aptrweb.org/?AHRQResidency

APTR offers continuing field placements for Preventive Medicine and Primary Care residents based at the Office of Disease Prevention and Health Promotion (ODPHP) in the Office of the Assistant Secretary for Health within the Office of the Secretary at the U.S. Department of Health and Human Services (HHS). The APTR-ODPHP Health Policy Residency Rotation Program provides excellent learning opportunities in health policy for preventive medicine and primary care residents. Residents witness federal health policy in the making and consider the significant role of physicians in the process. During the rotation, residents have the opportunity to work on national preventive health initiatives as well as attend meetings and briefings with high-level policy makers and other prevention-related events in the Washington, DC area. 2015 to 2016 program already in session. Application for next cycle is not yet available.

The Association of Schools of Public Health (ASPH)

1900 M Street NW, Suite 710
Washington, DC 20036
https://internships.asph.org/index.cfm

ASPH/CDC Allan Rosenfield Global Health Fellowship Program
https://fellowships.aspph.org/programs/details.cfm?programID=2

The fellowship is an outstanding training opportunity to learn from leading global health experts in CDC headquarters in Atlanta as well as various international posts. The students selected as Allan Rosenfield Global Health Fellows are expected to involve themselves, as Dr. Rosenfield
did throughout his career, in all aspects of global health. Dr. Rosenfield touched many corners of public health as a leader addressing issues from women’s health to HIV/AIDS to advocating for healthcare for the poor and disadvantaged. His commitment to improving lives in neighborhoods not only close to us, but in places such as rural sub-Saharan Africa and Asia, leaves behind a powerful footprint that we hope to motivate our fellows to follow during the period of their fellowship and throughout their public health career. The purpose of the fellowship program is to enhance training of graduates of ASPPH member schools and programs of public health with an interest in global health and HIV/AIDS. The training offered through this program will expand the global health prevention workforce and provide fellows an opportunity to gain practical, first-hand experience on the front lines of global public health. Fellows will benefit from an opportunity to apply and translate academic knowledge of public health to real world situations. Application for next cycle is not yet available.

**ASPH/CDC Public Health Internship Program**

https://internships.aspph.org/programs/details.cfm?programID=!%230%20%20%0A

The ASPH/CDC Public Health Internship Program is a collaborative effort between the Association of Schools of Public Health (ASPH) and the Centers for Disease Control and Prevention (CDC). One of the primary purposes of this effort is to “identify new approaches and opportunities for field experience in which graduate candidates and early career professionals with graduate degrees can practice applying skills and knowledge learned in the classroom and field.” The purpose of the Program is to enable schools of public health to assign graduate students in public health to the CDC for on-site training. In addition to possibly fulfilling an internship requirement, students will benefit from: exposure to state-of-the-art information; acquisition of skills and knowledge useful to their careers; and interaction with technical experts in their chosen fields. Upon completion of the Internship, the selected applicant will have made a useful contribution to a project of public health importance that is related to the mission of CDC. In addition, the selected applicant will have carried out scientific work that, if applicable, may be acceptable to the sponsoring academic institution for degree credit as specified at the beginning of the internship. Program not currently accepting applications and there is no indication of whether or not it will continue.

**ASPH Public Health Policy Fellowship (Congressional)**

https://fellowships.aspph.org/programs/details.cfm?programID=19

The ASPH Public Health Policy Fellow(s) gain hands-on health policy experience with congressional and executive offices in Washington, DC. Fellow(s) are placed in a pre-determined office, and receive a variety of educational and professional development opportunities, including participation in an intensive training session on understanding the Legislative process. Typically ASPH Public Health Policy Fellows will: help develop legislative proposals, arrange hearings, brief legislators for committee sessions and floor debates, staff House-Senate conferences. This Fellowship will provide a unique opportunity for a motivated and experienced individual to play a role in helping to shape United States health policy. Specific anticipated benefits include: development of a thorough understanding of the public health policy and the legislative process; access and networking with experienced policymakers, public health professionals, and experts in the field of public health; and, obtain hands-on real world health...
policy experience in the fast-paced environment of Capitol Hill. Program not currently accepting applications and there is no indication of whether or not it will continue.

**CDC/CSTE Applied Epidemiology Fellowship Program**
https://fellowships.aspph.org/programs/details.cfm?programID=11

CSTE, in collaboration with the Centers for Disease Control and Prevention (CDC), the Association of Schools and Programs of Public Health (ASPPH), and the Health Resources and Services Administration (HRSA), established this fellowship to train recent graduates in the expanding field of applied epidemiology. The CDC/CSTE Fellowship is designed for recent or impending master’s or doctoral-level graduates in epidemiology or a related field who are interested in the practice of public health at the state or local level. While the program provides rigorous training for its participants, it is also designed with flexibility in order to meet the particular interests of the fellow. Fellows are matched to a state health department for a two-year fellowship position based on program area of interest. Program areas include: Chronic Diseases; Environmental Health (including Waterborne Diseases); Infectious Disease (including Healthcare-associated Infections, Quarantine, and Food Safety); Injury Prevention (including Drug Overdose); Maternal and Child Health; Occupational Health; Oral Health; Substance Abuse.

**Association of University Programs in Health Administration (AUPHA)**

**David Winston Health Policy Fellowship (Congressional)**
http://www.winstonfellowship.org/

The David A. Winston Health Policy Fellowship is a distinguished postgraduate fellowship in health policy. The Fellowship was established in 1987 to commemorate the contributions and personal commitment of David A. Winston who, for twenty years, played a significant role in shaping American health policy at both the state and federal levels. The object of the Fellowship is to provide a unique opportunity for promising students to learn about the political system through direct exposure to the roles of both the public and private sectors in health policy development. The Fellowship provides a monthly stipend and related expenses for a twelve-month period from July to June. The Fellowship is a unique opportunity because the program includes systematic exposure to organizations, associations and coalitions in the private sector as well as policy development centers in Congress and the Administration. A distinguished Fellowship Board has the responsibility of helping assure the quality of the experience. The objective of the David A. Winston Health Policy Fellowship is to provide a unique opportunity to learn about the political system through direct exposure to public and private sector roles in health policy development. The Fellowship embodies Mr. Winston’s commitment to the public/private partnership necessary for a high quality, market oriented health care system. Last application deadline was in October 2016 and website does not yet show an application for the next cycle.
Congressional Hispanic Caucus Institute (CHCI)

Congressional Hispanic Caucus Institute
1128 16th Street, NW
Washington, D.C. 20036

**CHCI Public Policy Fellowship Program**
http://chci.org/programs/public_policy_fellowship/

The CHCI Public Policy Fellowship (PPF) seeks to enhance participants' leadership abilities, strengthen professional skills and ultimately produce more competent and competitive Latino professionals in public policy areas. This Fellowship Program offers talented Latinos, who have earned a bachelor's degree within two years of the program start date a paid, nine-month fellowship. This fellowship offers the opportunity to gain hands-on experience at the national level in the public policy area of their choice.

The Greenlining Institute

**Leadership Academy Fellows Program**
http://greenlining.org/leadership-academy/programs/fellowship-program/

The Fellowship Program is a year-long training program for young leaders who have completed, at minimum, their undergraduate degrees by the start of the program. Fellows are assigned to specific program areas and develop expertise with the direction of a Program Manager and the Academy Director. Each Fellowship experience is unique and is shaped by the current policy focus of their program area. Although the curriculum is similar to that of the Associates program, Fellows are given more responsibility and independence to implement projects and programs. The learning environment is based on combining experiential learning opportunities, individual development and team participation. Each Fellowship cohort is made up of 4-6 people and includes Legal Fellows.

Institute for Healthcare Improvement (IHI)

**The Kaiser Permanente Safety Net Fellowship**
www.IHI.org/Fellowships

The IHI Fellowship Program is a year-long immersion program for mid-career health professionals. The program has two overarching goals, to: develop health care leaders with the drive, skills, and experience to spread improvement in the United States and globally, and build capability within health care organizations to reach dramatically higher levels of performance. Fellows spend one year at IHI’s office in Cambridge, Massachusetts, and return to their home organization to lead transformative change.
Institute for Women’s Policy Research

Internships
http://www.iwpr.org/about/internships

The Institute for Women’s Policy Research (IWPR), located in Washington, D.C., conducts rigorous research and disseminates its findings to address the needs of women, promote public dialogue, and strengthen families, communities and societies. IWPR is committed to assisting the professional development of students and graduates interested in economic justice for women. IWPR's internship program is designed to provide participants with challenging work experiences under the guidance and supervision of staff with extensive knowledge of women's policy issues, social science research, and non-profit management.

NHMA Resident Leadership Program
http://www.nhmamd.org/index.php/programs/nhma-leadership-fellowship

The NHMA California Leadership Fellowship Program is being planned and is not officially announced. Check here for the announcement this summer. The program is being designed to promote leadership for members of NHMA through executive training and development. Ten mid-career physicians will be selected for the 2016 cohort. The primary selection criteria include
executive leadership potential at the local, regional and national level-- as evidenced by work experience and additional community activities. Applicants must have a minimum five years of professional experience after the completion of residency training, and letters of recommendation that are part of the application package. Training and support will be aimed at enhancing leadership capability, increasing an understanding of current key national and state health policy issues, including prevention, health care delivery and behavioral health care policies in California, and developing innovative perspectives on solutions to critical issues affecting Hispanic populations. Fellows will be expected to develop and present a proposal for a policy analysis to improve health care in the Hispanic community. In addition, Fellows will be provided the opportunity to develop a unique network with national and California experts in health policy and learn about public service careers. They will work with colleagues from across the nation, and participate in the development of future NHMA initiatives in health policy. This program is being planned and dates are t.b.d. including: 1) Sacramento Institute in 2016; and 2) Washington Institute I: October 2016 and Washington Institute II at NHMA Annual Conference in March 2017. Deadline to apply is January 31, 2016.

Partners Healthcare

The Kraft Center Fellowship in Community Health Leadership
http://www.partners.org/Graduate-Medical-Education/Residency-And-Fellowship-Programs/Kraft-Center-Fellowship/Default.aspx

The Kraft Fellowship in Community Health Leadership is a two-year program to prepare a new generation of physician leaders who will contribute to the field of community health and lead the development of new models of collaboration between academic medicine and community health centers. Through coursework at the Harvard School of Public Health, mentoring from community health center leaders and Harvard faculty, clinical practice in community health centers, and a scholarly project related to community health, the Fellowship will provide participants with clinical, research, management, and policy expertise to influence and advocate for improved health outcomes for underserved communities. The Kraft Fellowship in Community Health Leadership also offers student loan repayment of up to $50,000 in return for a three-year commitment to community health following completion of the program. Please note that the Kraft Fellowship in Community Health Leadership is now offered on an every-other-year basis only. The next class of Kraft Fellows will begin in July 2017. Applications for the Kraft Fellowships class beginning July 2017 are being accepted now. The Kraft Center will work with accepted physicians to arrange full-time employment in a relevant community health center for the year prior to the start of the Kraft Fellowship.

Women’s Research and Education Institute

Women’s Policy, Inc.
409 12th Street, SW
Suite 600
Washington, DC 20024
www.womenspolicy.org/

WREI Congressional Fellows on Women and Public Policy
http://www.womenspolicy.org/our-work/congressional-fellows/

Women’s Policy, Inc. has been the home for the Congressional Fellowships on Women and Public Policy since 2014 (formerly the WREI Fellowships). The fellowships are extended each year to a select number of students pursuing a graduate degree or those who have recently completed a master’s, doctorate, or professional degree with a proven commitment to equity for women. Fellows gain practical policymaking experience and graduate credit as they work from January to August in congressional offices. Fellows receive stipends toward living expenses. 2016 application deadline has passed and the website does not show an application for the next cycle.
B. Foundation Programs

Albert Schweitzer Fellows Program

The Albert Schweitzer Fellowship
330 Brookline Avenue (BR)
Boston, MA 02215
http://www.schweitzerfellowship.org/

The U.S. Albert Schweitzer Fellowship Program
http://www.schweitzerfellowship.org/chapters/

Each year, The Albert Schweitzer Fellowship (ASF) selects and supports more than 250 new university graduate school students to follow in Dr. Albert Schweitzer’s footsteps by improving the health and well-being of vulnerable populations. ASF’s U.S. Schweitzer Fellows Program immerses these students in an experiential learning process designed to develop and sharpen the skills and abilities necessary to become lifelong Leaders in Service: professionals skilled in creating positive change with and in our communities, our health and human service systems, and our world. Each U.S. Schweitzer Fellow partners with a community-based organization to identify an unmet health need, design a yearlong, 200-hour service project with a demonstrable impact on that need, and bring that project from idea to implementation and impact—all on top of his or her usual academic responsibilities. Simultaneously, Fellows undergo a mentored, reflective, and multidisciplinary leadership development program that enhances their ability to successfully carry out interventions that improve the health status of underserved people. Rooted in a holistic understanding of health, ASF’s programming and the Fellows’ Schweitzer service projects focus not only on clinical health issues, but also on the social determinants of health—the conditions in which people are born, grow, live, work and age, and which are mostly responsible for health inequities. Since its launch in 1992, the U.S. Schweitzer Fellows Program has grown to include thirteen program sites (Baltimore, Bay Area, Boston, Chicago, Columbus-Athens, Houston-Galveston, Los Angeles, New Hampshire-Vermont, New Orleans, North Carolina, and Pittsburgh).

Health and Aging Policy Fellows- Columbia University
http://www.healthandagingpolicy.org/
The year-long Health and Aging Policy Fellows program offers fellows the opportunity to participate in a residential track or a non-residential track. The residential track allows fellows to participate in the policymaking process on either the Federal or state level as legislative assistants in Congress, professional staff members in executive branch agencies or policy organizations. The non-residential track allows fellows to remain at their home institution but work on a policy project that involves brief placement(s) throughout the year at relevant sites. Core program components focused on career development and professional enrichment are provided for fellows in both tracks. The global track will allow 1-3 fellows to participate on global policy issues related to health and aging. The community track will allow 1-3 fellows to participate on state and local policy issues related to health and aging. The goals of the global and community tracks are for fellows to build global or local capacity in health and aging policy, respectively, and also to build long-term partnerships between the Health and Aging Policy Fellows Program and global or community foundations and other organizations. In all cases, we strive to establish partnership placement sites that commit resources to host a fellow and will work with organizations and placement sites to develop these partnerships.

IOM Anniversary Fellowship
http://iom.nationalacademies.org/activities/publichealth/AnnivFellowships

The Institute of Medicine (IOM) has established the IOM Anniversary Fellows program, which allows early career health science scholars to participate in evidence-based healthcare or public health studies that affect the health of the American people. This direct involvement in the work of the IOM prepares young investigators to contribute to the future direction of health care throughout their careers while also accelerating their career development. This fellowship program is designed for health science scholars who are one-to-ten years out from completion of a residency or receipt of a doctoral degree to participate in the process by which IOM provides health advice to the nation. This experience will enable the fellows to build a network of mentors who can be called on throughout their careers and will provide them with the perspective of studying healthcare challenges from a range of disciplines and viewpoints to develop sound healthcare strategies and policies. The IOM is interested in applicants with a diverse range of disciplines, specialties, and backgrounds, and is particularly interested in introducing women and underrepresented minorities to health care policy issues. There are several different endowed fellowships and several sponsored fellowships. Last application deadline was in 2015 and application for next cycles are not yet available.
The Bush Fellows Program
http://www.bushfoundation.org/solutions/building-leadership-capacity/bush_fellowship

The Bush Foundation is excited about and committed to supporting and developing leaders who are increasingly better equipped and networked to effectively lead change. These leaders think bigger and think differently about what is possible in their communities. Bush Fellows possess a vision for strengthening the common good within the region and are devoted to making that vision a reality. The Fellowship is distinctive in its flexibility, allowing Fellows to articulate what they need to become more effective leaders – whether through a self-designed learning experience or an academic program. It provides them with the resources and support to make it happen. Fellowship is an opportunity for Bush Fellows to increase their capacity for leadership by pursuing learning experiences that will increase their knowledge and develop important leadership skills and attributes, especially in the areas of communications, self-awareness, creativity, cultural competency and cross-sector leadership. A Bush Fellowship is intended to give Fellows access to learning experiences that wouldn’t otherwise be available to them. We expect the experiences to result in Fellows having an even greater vision for what is possible and a deeper commitment to taking action. 2016 application already closed and application for next cycle is not yet available.

The California Health Care Foundation (CHCF)

CHCF Health Care Leadership Program
Center for the Health Professions at UCSF
3333 California Street, Suite 410

CHCF Health Care Leadership Fellowship Program
http://futurehealth.ucsf.edu/Public/Leadership-Programs/Home.aspx?pid=145

The California HealthCare Foundation (CHCF) Health Care Leadership Program is a part-time, two-year fellowship that offers clinically trained health care professionals the experiences, competencies, and skills necessary for effective vision and leadership of our health care system. Fellows attend seminars six times during the two-year program and they participate in ongoing learning activities throughout. Graduates of the program acquire broadened management and sharpened leadership skills, and they gain unique insight into the trends and challenges facing
health care leaders in California. Applications for 2016-2017 program year is closed and application for the next cycle is not yet available.

Clinic Leadership Program
http://www.futurehealth.ucsf.edu/Public/Leadership-Programs/Home.aspx?pid=33

Participants go through an 18-month, part-time program to build their skills in areas such as decision-making, financial management, and strategic planning. This unique and challenging program provides participants with career planning, seminars, professional coaching, and peer networking experiences. Watch a video series of an alumnus of Clinic Leadership Institute Emerging Leaders discuss her experience as a participant in the program. Clinic Leadership Institute is a signature project of Blue Shield of California Foundation, a private foundation whose mission is to improve the lives of Californians, particularly underserved populations, by making health care accessible, effective, and affordable for all Californians, and by ending domestic violence. The Institute’s program and course content are administered by the Center for the Health Professions at UCSF, a nationally recognized resource on health workforce, organizational change, and leadership development and training. Application for 2016-2017 has closed. Application for the next cycle is not yet available.

The Rosalynn Carter Fellowships for Mental Health Journalism
http://www.cartercenter.org/health/mental_health/fellowships/index.html

Mental illnesses constitute some of the most serious, unrecognized, and under-reported health problems in the United States and around the world. As part of an international effort to reduce stigma and discrimination, The Rosalynn Carter Fellowships for Mental Health Journalism provide stipends to journalists from the United States and Colombia — and previously in Romania, South Africa, and New Zealand — to report on topics related to mental health or mental illnesses. The goals of the fellowships are to: Increase accurate reporting on mental health issues and decrease incorrect, stereotypical information; Help journalists produce high-quality work that reflects an understanding of mental health issues through exposure to well-established resources in the field; Develop a cadre of better-informed print and electronic journalists who will more accurately report information through newspapers, magazines, radio, television, film, and online and social media, influencing their peers to do the same.

The Commonwealth Fund’s Harkness Fellowships in Health Care Policy and Practice
http://www.commonwealthfund.org/Fellowships/Harkness-Fellowships.aspx

The Commonwealth Fund invites promising mid-career professionals—academic researchers, clinicians, managers, government policymakers, and journalists—from Australia, Canada, France, Germany, the Netherlands, New Zealand, Norway, Sweden, and the United Kingdom, to apply for a unique opportunity to spend up to 12 months in the United States as a Harkness Fellow in Health Care Policy and Practice. Fellows work with leading U.S. experts to study a critical issue on the health policy agenda in both the U.S. and their home country. A rich program of seminars organized by the Fund throughout the year further enhances the fellowship experience (described in the Fellowship Seminars section.) Fellows can expect to gain an in-depth understanding of the U.S. health care system and policy challenges, enhance their methodological skills, and develop valuable contacts and opportunities for ongoing cross-national exchange and collaboration.

Congressional Black Caucus Foundation (CBC)

Washington, DC 20036

CBC Spouses Education Scholarship
http://www.cbcfinc.org/scholarships/

Seeing an educational need in their congressional districts, the CBC Spouses Education Scholarship was established in 1988 by the spouses of Congressional Black Caucus members in response to federal cuts in spending for education programs and scholarships, which disproportionately affect people of color. This scholarship awards scholarships to academically talented and highly motivated students of all majors who intend to pursue full-time undergraduate, graduate, or doctoral degrees. Selected applicants will be qualified African-American or black students who reside or attend school in a CBC member district.

Louis Stokes Urban Health Policy Fellows Program
http://www.cbcfinc.org/fellowships/

The Louis Stokes Urban Health Policy Fellows Program is a 20-month policy training and leadership development program that targets early to mid-level policy professionals who are committed to eliminating health disparities nationally and globally. CBCF Louis Stokes Fellows
receive health policy training while working in a CBC Member’s office as well on a congressional committee. Typically, they spend ten months working in a congressional member’s office and the remaining ten months working on a congressional committee that focuses on health-related issues. CBCF complements the fellows’ policy training on the Hill by providing opportunities to improve and develop leadership skills so they can be more effective in their professional roles. The program also includes educational enrichment opportunities through seminars on policy and politics. These seminars explore hot-button policy issues, the politics of policymaking and policy implementation, and evaluation of policy already implemented. Fellows are also exposed to the history and work of the Congressional Black Caucus, and prepared to analyze the impact of policies on African Americans and other minority groups.

Ford Foundation

Ford Foundation
320 East 43rd Street
New York, NY 10017
Tel. (212) 573-5000
http://www.fordfound.org/

Dissertation Fellowships
http://sites.nationalacademies.org/PGA/FordFellowships/index.htm

The dissertation fellowships provide one year of support for individuals working to complete a dissertation leading to a Doctor of Philosophy (Ph.D.) or Doctor of Science (Sc.D.) degree. The Ford Foundation Dissertation Fellowship is intended to support the final year of writing and defense of the dissertation. Dissertation fellowships will be awarded in a national competition administered by the National Academies of Sciences, Engineering, and Medicine on behalf of the Ford Foundation. The awards will be made to individuals who, in the judgment of the review panels, have demonstrated superior academic achievement, are committed to a career in teaching and research at the college or university level, show promise of future achievement as scholars and teachers, and are well prepared to use diversity as a resource for enriching the education of all students.

National Forum for Black Public Administrators
http://www.nfbpa.org/

The National Forum for Black Public Administrators is the principal and most progressive organization dedicated to the advancement of black public leadership in local and state governments. NFBPA administrators are on the frontline working to solve pressing community and human service issues. In support of these administrators, NFBPA provides training and other professional development programs, research and policy analysis and collegial networking. The capstone of the NFBPA efforts is its annual conference, the FORUM.
Post-doctoral Fellowships for Minorities
http://sites.nationalacademies.org/PGA/FordFellowships/PGA_047960

Postdoctoral fellowships will be awarded in a national competition administered by the National Academies of Sciences, Engineering, and Medicine on behalf of the Ford Foundation. The awards will be made to individuals who, in the judgment of the review panels, have demonstrated superior academic achievement, are committed to a career in teaching and research at the college or university level, show promise of future achievement as scholars and teachers, and are well prepared to use diversity as a resource for enriching the education of all students.

Research Associateship Programs
http://sites.nationalacademies.org/PGA/RAP/index.htm

The mission of the NRC Research Associateship Programs (RAP) is to promote excellence in scientific and technological research conducted by the U.S. government through the administration of programs offering graduate, postdoctoral, and senior level research opportunities at sponsoring federal laboratories and affiliated institutions. In these programs, prospective applicants select a research project or projects from among the large group of opportunities listed on this website. Prior to completing an application, prospective applicants should contact the proposed Research Adviser to assure that funding will be available if their application is recommended by NRC Research Associateship Program panels. Once mutual interest is established between a prospective applicant and a Research Adviser, an application is submitted through the NRC Research Associateship Programs WebRAP system. Reviews are conducted four times each year, and review results are available approximately six-eight weeks following the application deadline.

The Woodrow Wilson Program in Public Policy and International Affairs, MPP for Physicians
http://wws.princeton.edu/admissions/mpp

The Woodrow Wilson School offers a one-year Master in Public Policy (MPP) degree for mid-career professionals who are rising leaders in international and domestic public policy. The MPP program provides rigorous training in quantitative and policy analysis, preparing degree candidates to return to their careers with the intellectual breadth, organizational skills and self-confidence necessary to assume leadership positions in an increasingly complex public service environment.

Foundation for the History of Women in Medicine
http://www.fhwim.org/

Women in Medicine Fellowship
http://www.fhwim.org/fellowships/foundation-fellowships/

The Foundation for the History of Women in Medicine will provide one $5000 grant to support travel, lodging, and incidental expenses for a flexible research period. Foundation Fellowships are offered for research related to the history of women to be conducted at the Center for the
History of Medicine at the Francis A. Countway Library of Medicine. Preference will be given to projects that deal specifically with women physicians or other health workers or medical scientists, but proposals dealing with the history of women’s health issues may also be considered. The fellowship proposal should demonstrate that the Countway Library has resources central to the research topic. Manuscript collections which may be of special interest include the recently-opened Eva Neer Papers, Priscilla Schaffer Papers, or Marion Cabot Putnum Papers, or the collections of pioneers Mary Ellen Avery, Elizabeth Hay, or Grete Bibring. Preference will be given to those who are using collections from the Center’s Archives for Women in Medicine but research on the topic of women in medicine using other material from the Countway Library will be considered (see our research guides list for online finding aids or Hollis for the most comprehensive information about all our holdings). Preference will also be given to applicants who live beyond commuting distance of the Countway, but all are encouraged to apply, including graduate students.

**Young Scholars Program**

[http://fcd-us.org/our-work/young-scholars-program](http://fcd-us.org/our-work/young-scholars-program)

The FCD Young Scholars Program (YSP) supports policy and practice-relevant research that is focused on the early learning and development needs of the nation’s children who are growing up under conditions of economic insecurity and social exclusion. YSP encourages applications from scholars who are: Themselves from historically disadvantaged or underrepresented groups, e.g. first-generation college graduates, and those from low-income communities; Scholars who represent a variety of disciplines and methodological approaches and that examine the impact of mental, physical, health, social, economic, institutional, and community factors on early learning and child development. Application deadline has passed and application for the next cycle is not yet available.

**Heinz Family Foundation**

**Class of 1960 John Heinz Government Service Fellowship**

[http://www.yale.edu/yalecollege/international/funding/fellowships/index.html](http://www.yale.edu/yalecollege/international/funding/fellowships/index.html)  
[https://yale.communityforce.com/Funds/Search.aspx](https://yale.communityforce.com/Funds/Search.aspx) ([search ‘heinz fellowship’](https://yale.communityforce.com/Funds/Search.aspx) **(search ‘heinz fellowship’)**)

The Class of 1960 established the John Heinz Government Service Fellowship to honor the achievements of the late Senator John Heinz and to foster the spirit of public service he exemplified. The fellowship is open to all sophomores and juniors in Yale College who demonstrate that their intellectual or personal development would be significantly enhanced by
an American government service internship in Federal, State, or local government (but not service with a private entity funded by government) during the summer following the sophomore or junior year. Fellowship proposals will be evaluated for their connection with the candidate's previous educational and work-related experience, and future goals in government service.

**The Joseph P. Kennedy, Jr. Foundation**

The Joseph P. Kennedy, Jr. Foundation  
1133 19th Street NW, 12th Floor  
Washington, DC 20036-3604

Email: eidelman@jp kf.org

**The Joseph P. Kennedy, Jr. Foundation Professional Public Policy Fellowship**  
http://www.jp kf.org/Pages/Interest-Areas/Fellowship.aspx

Each year the Foundation awards professionals and family members a stipend to work in Washington for a full year, where they actively participate in public policy development through work on the staff of a congressional committee, or a federal agency. Former Public Policy Fellows describe the Fellowship as a major turning point in their lives. The coming year offers exciting opportunities to be involved in policy and legislative development in key areas such as special education, health and mental health care for persons with intellectual disability, child care, housing, justice, child welfare and other areas related to improving the quality of life for individuals with intellectual disabilities.

**The Paul & Daisy Soros Fellowships for New Americans**

Paul & Daisy Soros Fellowships for New Americans  
224 West 57th Street,  
New York City, NY 10019  
Phone: 212-547-6926  
http://www.pdsoros.org/

**The Paul & Daisy Soros Fellowships for New Americans**  
http://pdsoros-prod.punkave.net/fellowship

The purpose of the Fellowship is to provide opportunities for continuing generations of able and accomplished New Americans to achieve leadership in their chosen fields and to partake of the American dream. The program was established in recognition of the contributions New Americans have made to American life and in gratitude for the opportunities the United States afforded the founders of the Fellowship, Paul & Daisy Soros. It honors and supports the graduate educations of 30 New Americans – permanent residents or naturalized citizens if born abroad;
otherwise children of naturalized citizen parents -- each year. At the time of their selection, Fellows must be college seniors or early in the graduate programs for which they request support. Each Fellow receives tuition and living expenses that can total as much as $90,000 over two academic years. Fellows can study in any degree-granting program in any field at any university in the United States. Fellows are selected on the basis of merit – the specific criteria emphasize creativity, originality, initiative and sustained accomplishment -- in annual national competitions. Candidates apply directly. The program does not depend on recommendations from universities or regional screening. Neither financial need nor distributive considerations are taken into account in the selection process. Each Fellow attends two weekend conferences of Fellows. The great majority continue to be involved with the program through regional dinners, service in the selection process for later classes, etc.

The Mallinckrodt Scholars Program

Mallinckrodt Scholars Program

The Edward Mallinckrodt, Jr. Foundation is a private foundation that funds basic biomedical research in St Louis and throughout the United States. The mission of the Foundation is to support early stage investigators engaged in biomedical research that has the potential to significantly advance the understanding, diagnosis, or treatment of disease. Harvard Medical School (including its affiliated health care institutions) has been invited to nominate up to two candidates for the 2016 Mallinckrodt Scholar Program, a program that the Trustees of the Edward Mallinckrodt, Jr. Foundation have established to support early stage investigators engaged in biomedical research that has the potential to significantly advance the understanding, diagnosis, or treatment of disease. The chosen 2016 Scholar will be supported for four years, commencing October 1, 2016. The stipend will consist of $100,000 annually. Eligible candidates must: hold M.D. and/or Ph.D. degrees; be in their fifth to eighth year of a tenure-track position; have support to move their project forward to the point where other independent funding can be obtained; candidates may have an R01.

Robert Wood Johnson Foundation (RWJF)

Robert Wood Johnson Health Policy Fellowships
http://www.healthpolicyfellows.org/fellowship_howtoapply.php

The Robert Wood Johnson Foundation Health Policy Fellows program provides the nation’s most comprehensive fellowship experience at the nexus of health, science, and policy in Washington, D.C. It is an outstanding opportunity for exceptional midcareer health professionals and behavioral and social scientists with an interest in health and health care policy promoting the health of the nation. Fellows participate in the policy process at the federal level and use that leadership experience to improve health, health care and health policy. The fellowship requires, at a minimum, a 12-month residential experience in Washington, D.C., with additional support for health policy leadership development activities. The program will select up to seven fellows.
Open Society Foundations

The Open Society Fellowship was founded in 2008 to support individuals pursuing innovative and unconventional approaches to fundamental open society challenges. The fellowship funds work that will enrich public understanding of those challenges and stimulate far-reaching and probing conversations within the Open Society Foundations and in the world. A fellowship project might identify a problem that has not previously been recognized, develop new policy ideas to address familiar problems, or offer a new advocacy strategy. Project themes should cut across at least two areas of interest to the Open Society Foundations. Among these are human rights, government transparency, access to information and to justice, and the promotion of civil society and social inclusion. Fellows are expected to take full advantage of the foundations' expansive reach and work to bring new people and fresh ideas into the organization's ambit. Successful projects should push the boundaries of current thinking and carry lessons that can be applied to a variety of settings. Fellows may produce a variety of work products, including publications such as books, reports, or blogs; innovative public-education projects; or the launch of new campaigns or organizations. They may also engage in activities such as hosting panel discussions, traveling to conferences, participating in policy debates, and aggressively promoting their ideas in public venues.

Pew Charitable Trusts

Pew Charitable Trusts
2005 Market Street, Suite 2800

The Pew Scholars Program in the Biomedical Sciences
http://www.pewtrusts.org/en/projects/pew-biomedical-scholars/program-details

The Pew Scholars Program in the Biomedical Sciences provides funding to young investigators of outstanding promise in science relevant to the advancement of human health. The program makes grants to selected academic institutions to support the independent research of outstanding individuals who are in their first few years of their appointment at the assistant professor level. The current grant level is $240,000; $60,000 per year for a four-year period. Participating institutions have been selected on the basis of the scope of their work in biomedical research and recommended to The Pew Charitable Trusts by the National Advisory Committee of the Program.
C. Government-Sponsored Programs

Agency for Healthcare Research and Quality (AHRQ)

Agency for Healthcare Research and Quality
540 Gaither Road

Telephone: (301) 427-1104
http://www.ahrq.gov

National Research Service Awards (NRSA)
http://www.ahrq.gov/funding/training-grants/nrsa.html

AHRQ supports individual students pursuing postdoctoral research training through the NRSA postdoctoral fellowship grant. The purpose of this training fellowship is to provide support to promising fellows with the potential to become productive, independent investigators in health services research, with a research interest in areas and priorities relevant to the mission of AHRQ. NRSA awards provide stipends to fellows to help defray cost-of-living expense, funds towards tuition and fees, and an Institutional Allowance to help defray fellowship expenses such as health insurance, research supplies, equipment, books, and travel to scientific meetings.

Brown University
The Center's AHRQ-funded training program educates both physician and non-physician researchers, emphasizing research skills necessary to address fundamental questions of health care delivery and population health. Didactic training linked with hands-on supervised experience in health services research is provided. Fellows and graduate students are assigned a faculty mentor whose research is congruent with their interests. Under the guidance of their mentors, trainees identify a specific sub-project that they design, implement, and analyze. In addition, fellows also complete at least one minor project based upon their own interests and prior work. Fellows' present findings at national meetings, publish manuscripts, and submit or participate in research proposal development. Didactic training opportunities are available from courses offered in the graduate programs in Epidemiology, Biostatistics, and Health Services Research and physicians have the opportunity to obtain a Master of Science or MPH degree. All fellows participate in weekly seminars covering issues ranging from policy analysis to the ethical conduct of research, and participate in weekly research seminars in epidemiology and health services research methods.

Weill Cornell Medical College, New York
The objective of this post-graduate program is to train physicians investigators to conduct methodologically rigorous health services research focused on improving clinical practice and improving our health systems' ability to provide high quality, high value, effective health care that is useful for policy makers and relevant to stakeholders. We have a special emphasis on health disparities and improving quality. Our strength has been developing physicians to perform question-driven multidisciplinary research and preparing them to be independent investigators, with a special emphasis on developing minority investigators. The interdisciplinary two-year
program combines a didactic curriculum designed to provide conceptual and practical foundations and core competencies in health services research coupled with fellows' own independent research project leading to a Master's degree. Fellows are expected to complete all 30 courses in the formal curriculum and integrate the resultant knowledge and skills in the design and conduct of their own research project, which they present every 4-6 weeks at the Advanced Seminar in Health Services Research where mentors, program directors, and fellows provide group feedback.

Harvard University
The aim of the PhD Program in Health Policy is to train individuals for research and teaching careers in health policy and health services research. While the program is interdisciplinary in nature, students specialize in one of six concentrations: decision sciences, economics, ethics, evaluative science and statistics, management, or political analysis. In their dissertations, students apply knowledge gained from their area of concentration to health policy issues in one of four areas: global health, health care services, mental health, or public health. Approximately 125 faculty members from schools within the University are involved with the program, and students are free to take classes throughout the University. A hallmark of the program is the accessibility of faculty members to students and the commitment of faculty to students enrolled in the program.

Johns Hopkins University
The 3 areas of pre-doctoral training build from a common core of course work that emphasizes statistical modeling, measurement, and evaluation design methodologies that are applied using conceptual frameworks from health services research. Our goal is to educate students broadly and to offer them considerable latitude in selecting dissertation topics within each focus area. Our strength is a faculty that brings an unusual depth and breadth of expertise and active research programs in which trainees can participate and learn. The core faculty have academic appointments (primary or secondary) in Health Policy and Management (HPM). The core faculty are supplemented by a large number of resource faculty both from HPM and from elsewhere in Public Health and the Schools of Medicine, Nursing, Business, Arts & Sciences and Engineering.

Northwestern
The NU Integrated Fellowship, based at the Center for Healthcare Studies in the Institute for Public Health and Medicine (IPHAM) has faculty with research and mentorship expertise in Healthcare Quality and Safety Innovation, Healthcare Economics, Healthcare Equity, Maternal-Child Health, Healthcare Policy and Implementation, and Chronic Disease Care and Outcomes. In addition, through IPHAM, fellows have access to faculty research and mentorship expertise in Patient-Centered Outcomes, Community Health, Engineering and Health, Behavior and Health, Global Health, and Aging, Health and Society; additional key NU resources are the Biostatistical Collaboration Core, NU Bioinformatics Center, and well-established collaborations with numerous clinical departments (e.g., Anesthesia, Emergency Medicine, Medicine, Obstetrics and Gynecology, Pediatrics, and Surgery).
**University of Alabama at Birmingham**
The overall goal of the program is to prepare independent investigators to pursue health services, outcomes and effectiveness research careers focused on translating research evidence into practice. Among the research areas targeted for development are: reducing healthcare disparities, improving quality of care, and comparing the effectiveness and safety of prevention, diagnosis, and treatment options. Skills development will include exposure to relevant epidemiological, statistical, experimental, and quasi-experimental methodologies, analysis of large data sets, health outcomes assessment, and economic evaluation, all with an emphasis on the practical application of outcomes research methodology in translating research into practice.

**University of California, Los Angeles**
This program is a collaboration between UCLA’s Department of Health Policy and Management at the UCLA Fielding School of Public Health, RAND Health, the Schaeffer Center for Health Economics at the University of Southern California, and the Veterans Administration Center of Excellence for the Study of Healthcare Provider Behavior. The primary goal of this collaboration, called the Los Angeles Area Health Services Research Training Program, is to provide comprehensive training and experience to highly-qualified pre- and postdoctoral trainees, so that they may effectively engage in, and eventually lead, research and implementation activities aimed at improving the quality and efficiency of the U.S. health care system. Taking advantage of the expertise of faculty and researchers—over three dozen of whom have agreed to be mentors—at these institutions as well as a track-record of community involvement in the Los Angeles area, the Training Program focuses on several key research topics in which the collaboration has particular expertise: health systems change; health equity; health services outside the clinic; implementation science; patient, provider, and organizational decisionmaking; and health outcomes measurement.

**University of Chicago**
The Health Services Research Training Program will provide two to three years of support to outstanding candidates from predoctoral programs from both the University of Chicago and Northwestern University, leading to careers in health services research. The University of Chicago has been an ideal site in which to provide broad-based training in health services due to the extraordinary strength of its faculty in health services research and in the social science, biomedical, and statistical disciplines upon which health services research draws. The high caliber of students at the University of Chicago has been a notable strength of the ongoing and proposed programs. These students will now be able to draw on mentors from Northwestern University and trainees from there can interact with faculty at the University of Chicago.

**University of Michigan**
The primary goal of the postdoctoral program is to help trainees acquire the skills required of successful, independent investigators in health services research, including contextual insight and ability to ask novel and important research questions, methodological and analytic expertise, the ability to communicate effectively and disseminate their research, grantsmanship and other academic survival skills. Depending on their prior education and training, trainees will engage in didactic coursework necessary for acquiring skills in both quantitative and qualitative health services research. With strong mentorship from a team of experienced faculty researchers and access to rich data resources and other infrastructure, all post-doctoral trainees can "hit the
ground running" and engage in research projects immediately after starting their fellowships—both as project leads and as collaborators in faculty-directed research. This model has proven extremely successful, as evidenced by the scientific productivity and subsequent academic and funding success of current and former CHOP trainees.

**University of North Carolina**
Postdoctoral candidates can be persons with an MD, DDS/DMD, PharmD, PhD, Dr.PH or other relevant doctoral degrees and a serious commitment to a career in health services and patient-centered outcomes research (PCOR). Post-doctoral applicants can have graduated from any doctoral program, and are not restricted to graduation from UNC. Sheps Center affiliated faculty mentor all fellows on a regular basis. Core faculty of the fellowship include Dr. Morris Weinberger and Dr Mark Holmes of the Department of Health Policy and Management, ; Dr. Kathleen Thomas of the Sheps Center Program on Mental Health, Dr. Betsy Sleath of Pharmaceutical Outcomes and Policy of the UNC School of Pharmacy, Dr Barbara Mark of the School of Nursing, and Dr. Til Stürmer of the Department of Epidemiology. In addition to research methods, the program also focuses on career development, grant and scientific writing skills, and ethical issues in health services research.

**Yale University**
Post-doctoral trainees, who have completed PhD or MD education, will be selected based on substantial previous research training and research goals consistent with ongoing faculty projects. The typical duration of the post-doctoral training is 2 years, with the focus on mentored research. Post-doctoral training will encompass 100% of their effort; post-doctoral trainees will have no other assigned duties at the University.

**Centers for Disease Control and Prevention (CDC)**

**Minority Health Workforce Internships**
http://www.cdc.gov/minorityhealth/internships/opportunities.html

The Office of Minority Health and Health Equity (OMHHE) supports internship opportunities for qualified students at all levels of their education in order to increase the capacity of the organizations in which these students will work in the future. Whether you are looking for a summer internship or a year-long fellowship, you can gain valuable public health experience in by taking part in various programs such as Dr. James A. Ferguson Emerging Infectious Diseases Fellowship Program, Kennedy Kreiger Institute Research Initiatives for Student Enhancement and Hispanic-Serving Health Professions Schools, Inc. These are just a few examples of programs offered, more information is available via the website listed above.

**Post-Doctoral Research Fellowships for HIV Prevention in Communities of Color**
http://www.cdc.gov/hiv/dhap/ohe/orise.html

The fellowship seeks doctoral-level researchers (e.g., behavioral scientists, epidemiologists, social scientists, evaluators, economists, anthropologists, or MDs with research training and/or experience). Applicants must have completed their doctorates within the past five (5) years (i.e.,
no earlier than December 2010 and no later than December 2015. Applicants with documented evidence of research expertise or experience in communities of color, (i.e., African Americans, Latinos/Hispanics, American Indians/Alaska Natives, and Asians/Pacific Islanders) in the United States are preferred. Four successful applicants will be matched within one of the Branch listed below. Please click on the link for a description of the Branch. Specifics on the training positions will be provided during the interview process and the final selection of activities will be determined by the mentor and the fellow.

**Student Employment Program**

http://www.cdc.gov/employment/menu_student.html

If you are a student or a recent college graduate, and are looking for rewarding work experience to supplement your education, then the Pathways Program is just for you. The Pathways program is made up of three main components: the Internship Program which offers internship and summer employment opportunities to students; the Recent Graduates Program where recent college graduates can obtain enriching developmental work experience in public health and related support occupations; and the Presidential Management Fellows Program that offers leadership development opportunities to students who in the process of completing their master’s, law, or doctoral-level degree within the academic year.

**Public Health Informatics Fellowship Program (PHIFP)**

http://www.cdc.gov/PHIFP/

PHIFP is a 2-year, competency-based training program in public health informatics. The fellowship provides a problem-based learning environment in which fellows apply information and computer sciences and information technology to solve public health problems. You will have the opportunity to: learn about informatics and public health in an applied setting; work with teams involved in research and development of public health information systems; lead an informatics project; design, develop, implement, evaluate, and manage public health information systems.

**National Center for Health Statistics (NCHS)**

Centers for Disease Control and Prevention,
1600 Clifton Road,
Atlanta, GA 30329 USA
Telephone: 800-CDC-INFO
http://www.cdc.gov/nchs

**Post-doctoral Research Program**

http://www.cdc.gov/nchs/about/postdoc.htm
http://www.apa.org/about/awards/nchs-postdoc.aspx

The National Center for Health Statistics (NCHS) is a unique public resource for health information. As the nation’s principal health statistics agency, NCHS provides information to
develop programs and policies that will improve the health of the American people. NCHS’ mission is to monitor the health of the American people, with activities mirroring the multifaceted aspects of the health and health care environment. The objective of the NCHS Postdoctoral Research Program is to provide opportunities for postdoctoral candidates of unusual promise and ability to conduct research in areas of their choosing that are compatible with the interests of NCHS. General areas of interest for research at NCHS include statistical theory, survey methodology, statistical computing, economics, demography, and social and behavioral science.

NCHS/AcademyHealth Policy Fellowship
http://www.academyhealth.org/Training/content.cfm?ItemNumber=1441&navItemNumber=233

This fellowship program brings visiting scholars in health services research-related disciplines to the National Center for Health Statistics (NCHS) in Hyattsville, Maryland, for a period of 13 months to conduct studies of interest to policymakers and the health services research community. Fellows have access to NCHS data resources for use in their proposed studies, and also work on collaborative projects with NCHS staff.

The President’s Commission on White House Fellowships

The White House Fellows Program
https://www.whitehouse.gov/participate/fellows

Engagement in the work of the federal government lies at the heart of a White House Fellowship. Work assignments can offer unparalleled experience working with senior administration officials on ever changing issues and challenges. This work often requires long hours and, at times, unglamorous duties that require as much perseverance as ability on the Fellows' part. White House Fellows typically spend a year as full-time, paid assistants to senior White House Staff, the Vice President, Cabinet Secretaries and other top-ranking government officials. Their assignments demand a capacity for quick learning and a willingness to work hard, often on issues outside of their area of expertise. Responsibilities range from chairing interagency meetings and designing and implementing federal policies, to drafting speeches for cabinet secretaries to representing their agencies on Capitol Hill and in international treaty negotiations. Job assignments are made by the Director of the President's Commission on White House Fellowships in consultation with agency officials on the basis of interviews conducted during "Placement Week". Fellows receive a salary and benefits from the agency for which they work. White House Fellows cannot receive compensation from any other source during their year of government service.
US Office of Personnel Management/Department of Health and Human Services

Presidential Management Fellows

Bearing the Presidential moniker, the PMF Program is a flagship leadership development program at the entry level for advanced degree candidates. It was created more than three decades ago by Executive Order and has gone through many changes over the years. The Program attracts and selects the best candidates possible, but is really designed with a more narrow focus - developing a cadre of potential government leaders. It provides some sustenance during the first years of employment and encourages development of leadership capabilities. The PMF Program inculcates a lasting bond as well as a spirit of public service, ultimately encouraging and leading to a career in the government. You will give the best you have to give to a cause greater than yourself. You will bring fresh, new ideas and a willingness to take on challenges never dreamed possible. Your zeal for the position will serve to spark new energy and excitement in your co-workers. As part of the PMF "fraternal order," you will portray your elite status through the quality of your work and service to your country. You will need to demonstrate leadership, foster teamwork, set goals and, in the end, deliver something of value to the American people.

Veterans Administration (VA)

Department of Veteran Affairs, Veterans Health Administration
Office of Academic Affiliations (143)

Fellowship in Dental Research

The VA Dental Research Fellowship Program provides two years of post residency dental research, education, and clinical learning opportunities to eligible dentists. Fellows spend approximately 75 percent of their time in biomedical, clinical, and health services research and education and 25 percent in clinical care and teaching activities. Mentors of national stature provide guidance to fellows in rich learning environments. Fellows receive stipends based on previously completed accredited residency training plus experience in nationally recognized fellowships sponsored by the National Institute of Dental and Craniofacial Research or similar agencies and on index rates approved at the affiliated dental school and the respective VA facility.

Hartford Scholars Program

The Gerontological Society of America (GSA) offers a limited number of eligible PhD-level social workers from Veterans Health Administration the opportunity to participate in the Hartford/VA Scholars Program administered by GSA and funded by the John A. Hartford Foundation. This prestigious program provides mentorship and development for post-doctoral
social workers pursuing advanced skills in research, administration, and/or policy careers involving issues of aging. VA Social Workers selected as Scholars must be able to devote time to research and other scholarly activity related to their training and research project. Hartford/VA Scholars will participate in an annual workshop to be held at The GSA Annual Scientific Meeting, will be appointed a national research mentor, and will engage in alumni network activities. The Scholars Program will provide financial support for reasonable travel expenses for Hartford/VA Scholar’s participation in the Program, in accordance with both organizations’ policies and legal requirements.

VA Advanced Fellowship in Geriatrics

The purpose of the VA Advanced Fellowship in Geriatrics is to offer post-specialty education to foster the development of leadership in health care issues of the elderly. The program capitalizes on the international prominence of VA's Geriatric Research, Education, and Clinical Centers (GRECCs) to provide outstanding training opportunities in clinical practice, to contribute to the improvement of clinical practice, and to advance scholarly pursuits that will benefit care for elderly veterans and all older Americans. Physician fellows must have completed an ACGME or AOA accredited residency, and either already be certified or are actively pursuing board certification. This program shall not lead to board-eligibility in Geriatrics for physicians. Non-physicians must be post-doctoral for an associated health discipline.

VA Advanced Fellowship Program in Health Services Research and Development

The fellowship provides two years of post-residency, post-doctoral research, education, and clinical learning opportunities to eligible physicians and associated health/nursing professionals. Fellows spend approximately 75 percent of their time in research and education and 25 percent in clinical care at competitively selected VA sites. Mentors of national stature provide guidance to fellows in rich learning environments. Graduates are expected to be role models in leading, developing, conducting, and evaluating innovative health services research in a variety of clinical settings including VHA and other healthcare institutions that seek to improve care for Veterans and the Nation.

VA Advanced Fellowship Program in Advanced Substance Abuse Treatment
http://www.va.gov/oaa/specialfellows/programs/sf_advaddictiontreatment.asp

The Interprofessional Addiction Treatment Advanced Fellowship program provides two years of post-residency, post-doctoral research, education, and clinical learning opportunities to eligible physicians and associated health professionals. Fellows spend approximately 75 percent of their time in research and education and 25 percent in clinical care at selected VA sites. Mentors of national stature provide guidance to fellows in rich learning environments. Graduates are expected to be role models in leading, developing, conducting, and evaluating innovative research, education, and clinical care in health issues pertaining to Addiction Treatment.
D. Schools of Medicine

Georgetown University Medical Center-Dept. of Family Medicine
Georgetown University Medical Center-Dept. of Family Medicine
http://familymedicine.georgetown.edu/fellowships/

Community Health Center Director Development
http://familymedicine.georgetown.edu/fellowships/

This fellowship (formerly, "Community Health Center Director Development") is designed to train future physician leaders to become medical directors of Community Health Centers (CHCs). The fellow will provide Community-Oriented Primary Care in a medically underserved community, and receive faculty development training in preparation to becoming a role model and future teacher of medical students, residents and other health professionals. The fellow will serve as an instructor and junior faculty member, assisting other department faculty in several aspects of teaching, research, and clinical practice.

Harvard Medical School (HMS)

http://www.med.harvard.edu

Administrative Fellowship Program
http://diversity.harvard.edu/pages/fellowship

Harvard University's Administrative Fellowship Program is one of the cornerstones of our diversity and inclusion efforts. We seek to attract talented professionals, and in particular members of historically underrepresented groups, to promote leadership opportunities and careers in higher education. The University encourages applications from individuals from all backgrounds and is committed to increasing the pipeline of talented individuals and professional opportunities for those interested in careers in higher education and administration. To this end, the Administrative Fellowship Program offers a twelve-month talent management experience complemented by a professional development program. The Program provides participants with opportunities to enhance their professional experiences by both working within an academic environment as a mid-level administrator and working in an area that broadens and deepens previous opportunities. The Program also seeks to enrich and diversify the Harvard and Cambridge communities by bringing innovative talented professionals to and from a variety of geographical and institutional locales.

The Developmental-Behavioral Pediatrics Fellowship Program
http://www.childrenshospital.org/centers-and-services/division-of-developmental-medicine/clinician-resources/dbp-fellowship

The Developmental-Behavioral Pediatrics Fellowship program is a comprehensive 3 year ACGME accredited program that provides comprehensive clinical, didactic and research training in Developmental-Behavioral Pediatrics and associated fields including genetics, metabolism,
neurology and psychiatry. The program is designed to provide outstanding clinical experiences coupled with mentored research opportunities tailored to each trainee’s chosen area of concentration. All trainees develop expertise in the diagnosis and treatment of developmental disorders including attention problems, autism spectrum disorders, language disorders, learning disabilities, and intellectual disability along with elective areas of their choice.

**Fellowship Program in General Medicine and Primary Care**
http://www.hms.harvard.edu/hfdfp

The Harvard Medical School Fellowship in General Medicine and Primary Care offers 2-year academic fellowships to prepare talented physicians for careers in academic medicine. Since the program began in 1979, we have trained over 250 fellows, who now work in prestigious institutions nationally and internationally. Funded by federal grants, private foundations, and participating clinical institutions, the Program offers each Fellow an appointment at Harvard Medical School and one of its affiliated hospitals or departments. All fellows qualifying for acceptance to the Harvard School of Public Health pursue a rigorous curriculum that can lead to a Master of Public Health or Master of Science degree. Each Fellow is expected to design, conduct, present, and publish several original investigative projects that lay the foundation for future careers as leaders in general medicine and research. The fellowship is currently led by Christina Wee, MD, MPH at Beth Israel Deaconess Medical Center and Jennifer Haas, MD, MSPH at Brigham and Women’s Hospital.

**The General Academic Pediatrics Fellowship**

The goal of this fellowship is to prepare fellows for academic leadership careers. The curriculum teaches skills necessary to become effective clinicians, creative teachers, and knowledgeable and productive researchers. The General Academic Pediatrics Fellowship provides training in the broad field of general academic pediatrics over a period of two to three years, and is part of the Harvard-wide collaborative program to develop General Internal Medicine and General Pediatrics faculty who can conduct research relevant to primary care.

**Pediatric Environmental Health Fellowship**

The Pediatric Environmental Health Fellowship will introduce fellows to issues in environmental health, and educate them about the interactions – biological, social and cultural – between children and the environment. The training program includes training in research and teaching in environmental health.
Pediatric Health Services Research Fellowship Program
http://www.childrenshospital.org/centers-and-services/pediatric-health-services-research-fellowship-program

The principal goal of our two-year program is to develop expert investigators whose research will fundamentally improve the capacity of the U.S. healthcare system to meet the needs of children and families, including socio-economically disadvantaged and minority populations. The diverse research projects conducted by our faculty and fellows share the goal of improving pediatric care along the six dimensions of quality articulated by the Institute of Medicine - care that is safe, effective, timely, efficient, patient centered, and equitable.

Medical College of Pennsylvania and Hahnemann University

Executive Leadership in Academic Medicine for Women (ELAM)
http://www.drexelmed.edu/Home/OtherPrograms/ExecutiveLeadershipinAcademicMedicine/ApplicationInformation.aspx

The Hedwig van Ameringen Executive Leadership in Academic Medicine® (ELAM®) program is a year-long part-time fellowship for women faculty in schools of medicine, dentistry and public health. The program is dedicated to developing the professional and personal skills required to lead and manage in today's complex health care environment, with special attention to the unique challenges facing women in leadership positions. More than 800 ELAM alumnae hold leadership positions in institutions around the world.

Morehouse School of Medicine

Health Policy Leadership Fellowship Program
http://www.msm.edu/Research/research_centersandinstitutes/SHLI/aboutUs/healthPolicyInstitute/leadershipFellows/

The Health Policy Leadership Fellowship Program (est. 2009) is a multi-disciplinary training program designed to provide postdoctoral professionals with the specific knowledge, experiences, and skills needed to prepare them for leadership roles promoting and implementing policies and practices that reduce health disparities and advance health equity. Consistent with the vision and mission of the Satcher Health Leadership Institute (SHLI), it is the goal of the fellowship program to develop a diverse group of health leaders who care enough, know enough, do enough and are persistent enough to help realize global health equity. Fellowship candidates may also be considered for a unique concurrent training program through our partnership with Georgia State University’s Center for Leadership in Disability. The Georgia Leadership Education in Neurodevelopmental and Related Disorders (GaLEND) interdisciplinary training program prepares health leaders to serve children with developmental disorders and their families. Combined Health Policy/GaLEND fellows divide their time, fulfilling the requirements of both programs.
Mount Sinai School of Medicine

Environmental Medicine Internship Program for Minority Students

The Mount Sinai Environmental Medicine Internship Program for Minority Students invites minority students interested in the biomedical sciences to participate in our short-term training opportunity in environmental and occupational health research. The Program's multidisciplinary focus allows interns to explore their interests while participating in cutting-edge biomedical research in New York City. Interns are also provided with individual career counseling, guidance, and support.

University of Colorado Health Sciences

Native Investigator Development Program
http://www.ucdenver.edu/academics/colleges/PublicHealth/research/centers/CAIANH/NERC/ni/Pages/ApplicationProcess.aspx

The Centers for American Indian and Alaska Native Health in the School of Public Health at University of Colorado Denver is the only National Institute on Aging funded Resource Center for Minority Aging Research (RCMAR) devoted to Native Elder health. This leading-edge program is designed to train the next generation of Native Investigators to study the pressing gerontological health issues in American Indians and Alaska Natives (AI/AN) peoples. The purpose of this solicitation is to recruit the next cadre of Native Investigators into the program. The program provides a unique opportunity for qualified candidates to improve their research capabilities and skills in the social, behavioral and health sciences. The ultimately goal is for the candidates to become self-sustaining independent investigators conducting research at the interface of aging, health and culture.

University of California San Francisco School of Medicine

Postdoctoral Training Programs- Philip R. Lee Institute for Health Policy Studies
http://healthpolicy.ucsf.edu/training/prl-fellowship

The Philip R. Lee Health Policy Fellowship Program enables the Philip R. Lee Institute for Health Policy Studies to train a new generation of health policy and health services research leaders from diverse backgrounds. It acknowledges Dr. Lee whose life has been devoted to championing greater diversity in our health workforce, teaching and mentoring future health policy leaders, shaping and implementing health policies to improve health care and the health of all people, and fostering innovative health policy research through the establishment of the Institute for Health Policy Studies. The fellowship can be undertaken in either one year or two. The specific course of study is tailored to the individual’s needs and career trajectory, while the Program provides an integrated curriculum of coursework, mentoring, and supervised research.
that emphasizes learning-by-doing in a multidisciplinary environment. While coursework is required, the nature of the courses taken is ultimately up to the fellow. Many of our fellows choose to take a selection of courses from the Training in Clinical Research program, while others choose to take classes more closely tied to their field of interest.

UCSF AIDS Research Institute and Center for AIDS Prevention Studies

Traineeships in AIDS Prevention Studies (TAPS) Postdoctoral Fellowships

http://caps.ucsf.edu/training/taps/

The Traineeships in AIDS Prevention Studies (TAPS) program trains scientists for academic and public health careers. We invite applications for two- and three-year postdoctoral fellowships in studies relating to the prevention of AIDS. Offered through the UCSF Department of Medicine, TAPS is located at the Center for AIDS Prevention Studies (CAPS), which is itself part of the Division of Prevention Science within the Department of Medicine. Candidates must hold a PhD, MD, or equivalent doctorate degree. The program is suitable for those who are currently completing their doctoral, residency, or clinical fellowship programs as well as for those who have recently completed their doctoral degrees and seek careers as independent researchers. CAPS, with its unique combination of institutional resources and access to groundbreaking and state-of-the-art HIV research and researchers of world renown across numerous disciplines, provides an excellent environment for postdoctoral training. More than 80 AIDS-related research projects now being implemented by CAPS investigators will provide a wide variety of opportunities for participation by TAPS fellows. To accomplish its goal, CAPS offers fellows supplementary academic preparation in research methods, public health, AIDS, and other specific learning objectives and gives closely supervised experiences in AIDS prevention research. Fellows who already have a master of public health (MPH) degree or its equivalent may complete the program in two years; those who do not will be required to complete the MPH degree at UC Berkeley in the first year, followed by two years of research training.

University of Illinois College of Medicine at Chicago

Directors, Global Women’s Health Fellowship
Department of Obstetrics and Gynecology
Chicago, IL

Global Women’s Health Fellowship

Internet: http://chicago.medicine.uic.edu/departments___programs/departments/obgyn/global_women_s_health/global_women_s_health_fellowship/

The purpose of this program is to provide training for clinical OB/GYN physicians in global women’s health research and service provision. We will educate future leaders in the global health community who will develop educational initiatives, improve clinical services, and promote research in global women’s reproductive health. The program will complement existing clinical skills in Obstetrics and Gynecology with public health course work, international field
experience, and mentorship. Fellows will be expected to utilize collaborations within the UIC community (School of Public Health, School of Nursing, Department of Anthropology) and develop relationships with international governmental and non-governmental organizations in order to perform effective global health work. The program will be a platform to build strong relationships in locations and situations that lack the infrastructure and/or organization to address reproductive health issues. There are limited opportunities for advanced training of this nature. Given the growing need for physician leadership in the international women’s health community, this program will provide experience, leadership, and opportunities in global women’s health research and clinical care.

University of Massachusetts Medical Center

Undergraduate Summer NIH Research Fellowship Program
http://www.umassmed.edu/summer/index.aspx

The University of Massachusetts Medical School (UMMS) Combined Summer Undergraduate Research Opportunity is a non-credit, ten-week, structured research experience sponsored by UMMS Office of School Services. The program consists of "hands-on" laboratory research with an investigator serving as a mentor, role model and advisor. The Combined Summer Undergraduate Research Opportunity is funded by the National Institute of Health (NIH) and UMMS Office of Research. The program is designed to provide participants in-depth exposure to actual biomedical research. Participants will create career-building connections between researchers, post docs, graduate students, and peers. The program encourages participants to consider biomedical research as a viable career choice.

University of Minnesota School of Medicine

Center of American Indian and Minority Health
http://www.caimh.umn.edu/

The Center of American Indian and Minority Health (CAIMH) at the University of Minnesota Medical School strives to raise the health status of the Native American population by educating Native American students in the field of health care and Indian health. The Center of Excellence for American Indian Medical Education is a multi-campus program that offers American Indian medical students a career path in Indian health. It combines teams of Indian staff, faculty and advisors with culturally relevant programs to train medical students in the Indian Health Pathway. The Pathway offers direct exposure to clinical work in Indian health centers, practical courses in health-care delivery, and experience in traditional Indian medicine. Among others, it includes a course entitled "Health Care outside the Mainstream" as a model of health care developed for a specific population.
University of Texas School of Medicine

Éxito! Latino Cancer Research Leadership Training
http://exitotraining.org/

Éxito! Latino Cancer Research Leadership Training offers an annual summer institute and internships to increase diversity in Latino cancer research by encouraging Latino master’s-level students and health professionals to pursue a doctoral degree and a career in research. Éxito!, led by the Institute for Health Promotion Research (IHPR) at The UT Health Science Center at San Antonio conducts, seeks to enhance participants' understanding of the power of research to affect change; interest in cancer control research, from surveillance to epidemiology, individual behavior change, health services, and policy research; and skills in research, networking, and motivation to successfully apply to a doctoral program.
E. Schools of Public Health

Columbia School of Public Health

The Allan Rosenfield Scholars Fund
http://publichealth.columbia.edu/apply/financial-aid/scholarships-fellowships

This need-based scholarship is awarded annually to outstanding students pursuing a doctoral degree or performing post-doctoral research in the field of public health. Each student receives a tuition credit, as well as an annual living expense stipend. The scholarships are contingent on the academic excellence of the students. The fund was established in 2004 and is an integral part of supporting our future public health leaders.

Community Scholars Program
http://publichealth.columbia.edu/apply/financial-aid/scholarships-fellowships

A merit and/or need-based scholarship awarded annually to full-time MPH students in the department of Sociomedical Sciences. Selection for the scholarship is competitive and based on a review of all admission materials.

The Executive Master of Public Health (EMPH) Program
http://www.cumc.columbia.edu/dept/mailman/hpm/emph/admissions.html

The Executive MPH Program provides working health professionals with the skills, networks, and credentials needed to obtain a high-level management or policy position. The program has been an overwhelming success, attracting over 600 participants from both the United States and abroad who work at hospitals, health departments, managed care organizations, consulting firms, law firms, pharmaceutical companies, and other healthcare settings. Participants attend classes for one long week-end (Thursday to Sunday) a month for 24 months. The curriculum provides an overview of the political, legal and economic forces that shape the healthcare system, an introduction to the core principles of public health, and a hands-on immersion into the principles and the practices of effective management. The faculty includes full-time Professors from the Mailman School of Public Health along with senior practitioners.

Gemson Scholarship
http://publichealth.columbia.edu/apply/financial-aid/scholarships-fellowships

The Gemson Scholarship, established in an honor of Donald H. Gemson, MD, MPH ’85, provides support for doctoral students focusing in the area of health promotion and disease prevention.
Harriet and Robert H. Heilbrunn Scholars Program
http://publichealth.columbia.edu/apply/financial-aid/scholarships-fellowships

Made possible by a generous gift from Mr. and Mrs. Heilbrunn, this scholarship gives preference to minority students or individuals who plan to work in city, state, or federal public health agencies or public health oriented non-profit organizations after graduation.

Initiative for Maximizing Student Development (IMSD)
http://publichealth.columbia.edu/apply/financial-aid/scholarships-fellowships

The purpose of this program is to increase the number of underrepresented students who receive doctoral training in public health. The program is available to students who are United States citizens or permanent residents. In order to be eligible for the IMSD program, students must be accepted into any of the Mailman School's public health doctoral programs (DrPH or PhD programs in Biostatistics, Epidemiology, Environmental Health Sciences, or Sociomedical Sciences). The IMSD provides partial tuition coverage, a graduate research assistantship placement with a faculty mentor, and travel to one scientific conference per year. A separate application is required. For more information, contact Dr. Ana Abraido-Lanza, Program Director, at 212-305-1859.

Hearst Foundations Doctoral Fellowship in Aging and Public Health
http://publichealth.columbia.edu/apply/financial-aid/scholarships-fellowships

The Hearst Foundations Doctoral Fellowships in Aging and Public Health are awarded to doctoral students dedicated to making a positive impact on the field of healthy aging.

Latino Fellowship Program
http://publichealth.columbia.edu/apply/financial-aid/scholarships-fellowships

One half-tuition fellowship is offered this year to a student committed to working with Latino populations in the U.S. following completion of a Master's of Public Health through the Heilbrunn Department of Population and Family Health.

Peter Jay Sharp Scholarship
http://publichealth.columbia.edu/apply/financial-aid/scholarships-fellowships

This merit-based scholarship, established with a gift from the Peter Jay Sharp Foundation in memory of hotelier Peter Jay Sharp, provides a nonrenewable $25,000 scholarship to full-time MPH students. Awardees are selected primarily on the basis of public health career potential, demonstrated leadership ability, prior public health work, and community advocacy experience.

The Ray E. Trussell, MD, Fellowship
http://publichealth.columbia.edu/apply/financial-aid/scholarships-fellowships

This fellowship provides aid for a full-time student pursuing an MPH or Executive MPH in public health with a concentration in substance abuse prevention and public policy. Eligible
candidates must have proven training in psychiatry and substance abuse treatment and/or equivalent experience. Preference is given to applicants who have trained at Beth Israel Hospital or a Columbia University affiliated institution. This fellowship was established by Dr. Elizabeth Trussell in honor of her late husband, Ray E. Trussell, MD, dean of the Mailman School of Public Health from 1955 to 1968.

**Scholarships for Disadvantaged Students**

http://publichealth.columbia.edu/apply/financial-aid/scholarships-fellowships

This program provides a fellowship to students who demonstrate financial need and who are interested in gaining research experience with historically underserved communities. The fellowship is awarded to full-time, master's degree students who have overcome obstacles that impeded their academic progress and/or meet income-specific criteria. This scholarship requires submission of a parental tax return. Due to Federal Government budget constraints this grant is currently not being offered.

**Harvard School of Public Health (HSPH)**

9 Bow Street  
Cambridge, Massachusetts 02138  
Phone: 617-495-2021  
Email: popcenter@hsph.harvard.edu

**David E. Bell Postdoctoral Fellowship Program**

http://www.hsph.harvard.edu/population-development/training/bell-fellowship/

The Bell Fellowship Program provides opportunities for research and leadership training in a flexible, 1 or 2 year non-degree program for researchers and practitioners in the field of population and development. Selected candidates possess a strong record of academic training, a commitment to population and development work, the demonstrated ability to work independently, and leadership potential. Bell Fellows examine a broad range of critical issues in the field of population and development studies from multidisciplinary perspectives. Most will have interests that match the HCPDS’s focal areas: social and environmental determinants of population health; migration and immigration; causes and consequences of health transitions (aging societies); and health consequences of work place policies and work design. The wide range of perspectives will enhance the fellows’ experiences and broaden the community life at the Center.

**Yerby Postdoctoral Fellowship Program**

http://www.hsph.harvard.edu/administrative-offices/faculty-affairs/yerby-postdoctoral-fellowship-program/

The Yerby Postdoctoral Fellowship Program draws on the rich research environment and intellectual resources of one of the world’s premier public health training institutions, the Harvard T.H. Chan School of Public Health. This initiative is geared toward expanding the diversity of those entering academic public health. The program creates a bridge between
academic training in health-related disciplines and entry-level faculty positions at institutions throughout the United States. The goal of the program is to advance the intellectual and professional development of each Yerby fellow. Under the guidance of a senior Harvard Chan School faculty member with compatible interests, fellows develop their research agendas, gain experience in publishing papers in peer-reviewed journals and obtaining grant support, participate in a variety of professional development workshops, and increase their teaching expertise.

Johns Hopkins University School of Hygiene and Public Health

Post-Doctoral Fellowship in Urban Health
http://urbanhealth.jhu.edu/our_work/knowledge_sharing.html#postdoc

The goal of the UHI Postdoctoral Research Fellowship Program is to promote future leaders in the field of urban health. The fellows, each working in tandem with a Johns Hopkins faculty member, carry out scholarly research and develop publications on such issues as community violence, sexual health/STIs and HIV, early childhood development, community health assessments, and chronic diseases. This fellowship provides an opportunity to collaborate with faculty at Johns Hopkins in the Schools of Public Health, Nursing, Medicine, and Education. The fellow receives mentoring regarding research opportunities, publications, and career development, and, in collaboration with faculty, conducts research and publishes papers focusing on important topics in urban health.

St. Louis University School of Public Health

The Public Health Leadership Certificate Program
http://www.slu.edu/college-for-public-health-and-social-justice/academics/certificates

•Certificate in Biosecurity and Disaster Preparedness: offered through the Institute for Biosecurity at the College for Public Health & Social Justice, the curriculum consists of 15 hours that can later be applied to the MS in Biosecurity and Disaster Preparedness. Biosecurity is one of the most rapidly growing fields in public health and our programs train students to prepare for and respond to natural and man-made events.
Post-Master's Certificate in Applied Behavior Analysis: This certificate is for professionals with a master's degree in behavior analysis, education, or psychology, who are looking to further their skills and may want to seek BACB certification through field practica. Traditional classroom and online format available.
Certificate in Violence and Injury Prevention: Offered by Washington University's George Warren Brown School of Social Work and in collaboration with the University of Missouri-St. Louis. This package of courses, training opportunities, and field experience focuses on child abuse and neglect, parenting, partner violence, and injury prevention in young families. Students take courses at Washington University, SLU, and the University of Missouri-St. Louis to earn the certificate with either a young family or youth focus.
University of California at Los Angeles School of Public Health
http://www.ph.ucla.edu

Minority Training Program in Cancer Control Research
http://cancer.ucsf.edu/research/minority-training-program-in-cancer-control-research

Northern California is one of the most ethnically diverse regions in the world, and this diversity is evidenced in the master's level student populations training in health at Bay Area academic institutions. However, as is true elsewhere, only a small proportion of minority students go on to pursue doctoral degrees, resulting in a national shortage of experienced minority investigators in cancer prevention and control. The purpose of the Minority Training Program in Cancer Control Research (MTPCCR) is to increase ethnic diversity in the field of cancer disparities research by encouraging minority master’s students and master’s level health professionals in public health and social/behavioral sciences to pursue a doctoral degree and a career in research.

University of Michigan School of Public Health

Michigan Institute for Clinical and Health Research Health Disparities Summer Program
https://www.michr.umich.edu/education/summer

Researchers from diverse specialties and backgrounds are needed to design and conduct relevant studies to address health disparities, and to translate findings into individual, community, and policy interventions. The program engages students in key elements of health disparities research practice. MICHR offers an introductory level summer research program with a focus on health disparities. This program is geared for those enrolled in health professional degree or master's degree programs.

University of North Carolina at Chapel Hill

Executive Doctoral Program in Health Leadership

The Executive Doctoral Program in Health Leadership prepares mid-career professionals for senior-level positions in organizations working to improve the public’s health. The three-year, cohort-based distance program confers a DrPH in Health Administration. The Program targets diverse individuals working full-time in the U.S. or internationally with substantial leadership responsibilities in communities, organizations and institutions. Examples include domestic or international health directors, mid-career managers in government agencies or foundations, leaders within nonprofit and non-governmental organizations, program officers and other mid-level or senior managers, and others working within the health field, including entrepreneurs and individuals working in nontraditional settings affecting the health of the public. Students remain working in-country as they complete their degrees. With the exception of three short visits to
Chapel Hill or an alternate site in each of years one and two, learning takes place in participants’ homes and offices, away from the UNC campus.

**National Health Equity Research Webcast**

The annual live webcast is an interdisciplinary effort that builds on the expertise and support of UNC campus partners, community agencies, researchers and practitioners in health and education fields. The webcast appeals to organizations and individuals in North Carolina and across the nation with a focus on health equity, educational achievement and economic stabilization in all areas within our society.

**University of Oklahoma College of Public Health**

**Center for American Indian Health Research**

[http://www.ouhsc.edu/ouprc/](http://www.ouhsc.edu/ouprc/)

The University of Oklahoma Prevention Research Center (OUPRC) is one of 33 Prevention Research Centers funded by the Centers for Disease Control and Prevention. The OUPRC's primary focus is to study the obesity epidemic as it affects public school children and adolescents and to study the impact of interventions developed with schools, particularly in the area of physical activity. The OUPRC plans to work in partnership with more public schools, American Indian tribes and communities in Oklahoma to address this public health challenge.

**University of Saskatchewan**

**Banting Post-Doctoral Fellowships Program**

The Banting Postdoctoral Fellowships Program is administered by Canada’s three research granting councils (the Canadian Institutes of Health Research, the Natural Sciences and Engineering Research Council of Canada, and the Social Sciences and Humanities Research Council of Canada). The Banting Postdoctoral Fellowships Program aims to attract and retain top-tier postdoctoral talent, both nationally and internationally, to develop their leadership potential and to position them for success as research leaders of tomorrow, positively contributing to Canada’s economic, social and research-based growth through a research-intensive career.
Tulane University School of Public Health and Tropical Medicine

http://www.cdc.gov/Fellowships/CareerInternships.html

Graduate Research Fellowships

These fellowships are sponsored by the Centers for Disease Control and Prevention and the Tulane School of Public Health and Tropical Medicine. Research areas include a variety of topics in arthropod vector ecology, arbovirus ecology and molecular biology, malaria ecology, cell and molecular biology, epidemiology, integrated vector control and pathogen diagnostics. M.S. applicants should have a B.S. in biology, entomology or related field. Ph.D. candidates should have a M.S. in a biological science or related public health field. Preference will be given to applicants with excellent academic credentials, strong letters of reference and research or practice experience.
F. Schools/Institutes of Public Policy

The Asian Pacific American Institute for Congressional Studies (APAICS)

**The Daniel K. Inouye Fellowship**
https://jacl.org/internships-and-fellowships/

The Daniel K. Inouye Fellowship is named for the late United States senator from Hawaii. The fellow will monitor key legislative initiatives of importance to the JACL mission, and design and implement JACL-sponsored programs among other tasks and duties. This paid Fellowship is awarded to a qualified student or young professional who has completed at least an undergraduate degree. As of May 2015, JACL is now accepting applications for the Daniel K. Inouye Fellowship. Completed applications must be submitted to pouchida@jacl.org by Friday, July 31, 2015. Please click here for the Daniel K. Inouye Fellowship application.

Bernard M. Baruch College/CUNY School of Public Affairs

**Master of Public Administration Fellowship**
http://www.nuf.org/fellows-overview

The National Urban Fellows’ Academic & Leadership Development Fellowship Program is a rigorous, 14-month, full-time graduate degree program comprising four semesters of academic course work and a nine-month Mentorship assignment. During their Mentorship, Fellows complete course work via distance learning. Fellows receive a $25,000 stipend, health insurance, a book allowance, relocation and travel reimbursement, full payment of tuition, and professional leadership development. Additionally, Fellows are required to make a $7,500 co-investment to their National Urban Fellows experience. The program culminates in a Master of Public Administration (MPA) degree from the City of New York's Bernard M. Baruch College, School of Public Affairs. An MPA degree is awarded to Fellows upon completion of all academic and program requirements. Following graduation, Fellows become part of a prestigious group of well over 1,400 diverse public service leaders who have gone on to assume influential positions across government, philanthropic and nonprofit sectors.

Ellison Institute for World Health at Harvard University

**Burke Global Health Fellowship Program**
http://globalhealth.harvard.edu/burke-global-health-fellowship

The Burke Global Health Fellowship Program at the Harvard Global Health Institute provides funding for Harvard junior faculty members from across the University to support innovative research and undergraduate curriculum development and teaching in global health. The Fellowships are made possible through the generous support of Harvard alumna Katherine States Burke, AB’79, and her husband, T. Robert Burke who established the Burke Fund to help launch and advance the careers of promising junior faculty in global health. Burke Fellowship Research
awards provide opportunities for faculty to conduct foundational research that prepares them to be independent investigators or to conduct exploratory work on groundbreaking questions seldom supported by traditional funding sources. Burke Fellowship Curriculum awards give junior faculty the opportunity to apply innovative pedagogy to undergraduate course development.

**Harvard University - Zuckerman Fellows Program**

**The Zuckerman Fellows Program at Harvard University**  
[http://cpl.hks.harvard.edu/zuckerman-fellowship](http://cpl.hks.harvard.edu/zuckerman-fellowship)

The challenges we face in our public schools and public health systems, as well as in government at all levels, are too complicated to be solved without the insight and commitment of leaders with the highest-quality professional training. But for many who have a strong aptitude for public service, the opportunity costs associated with acquiring the necessary training are too high. In response to this problem, the Zuckerman Fellows Program equips people from the fields of medicine, law, and business to provide leadership for the common good by making it possible for them to pursue public service degrees at the Harvard Graduate School of Education, Harvard T. H. Chan School of Public Health, or Harvard Kennedy School. The Zuckerman Fellowship provides recipients with full tuition and health insurance fees plus a stipend of $17,000 for one year.

**John F. Kennedy School of Government, Harvard University**

**Edward S. Mason Program in Public Policy and Management**  
[http://www.hks.harvard.edu/degrees/masters/mc-mpa/mason](http://www.hks.harvard.edu/degrees/masters/mc-mpa/mason)

The Mid-Career Master in Public Administration Edward S. Mason Program (Mason Program) is the Harvard Kennedy School’s flagship international program. Each year, approximately 80 demonstrated leaders from developing, newly industrialized and transitional economy countries participate in this intensive one-year master’s degree program designed to prepare them to address the world’s most compelling development challenges. The emphasis of the program is on developing the broad range of analytical and leadership skills required to initiate and implement major political, social or economic change. The Mason Fellows bring an impressive range of backgrounds and experience to Harvard. Mason Fellows come from all across Africa, Asia, Latin America, the Caribbean, the Middle East, Eastern and Central Europe as well as the former Soviet Union and they are engaged in every aspect of economic, social and political development. A typical Mason class includes experienced professionals who have assumed leadership roles in education, energy, defense, housing, transportation, foreign affairs, public enterprise, rural and urban development, environmental preservation, central banking, journalism, politics and economic planning.
Executive Education Programs
http://ksgexecprogram.harvard.edu/Programs/By_Name.aspx

Executive Education at Harvard Kennedy School offers programs for leaders from around the world by bringing together experienced professionals, a world-class faculty, and a dynamic curriculum in a setting where the common denominator is a shared commitment to public value. The result is a lasting transformational leadership experience. To find more information about current program offerings visit the website listed above.

Jerome H. Grossman M.D. Graduate Fellowships
http://www.hks.harvard.edu/centers/mrcbg/programs/health/grossman

Tackling the complex and critical challenges facing the United States health care system requires visionary leaders who combine knowledge and experience in the practice of medicine with the public leadership and policy analysis skills needed to drive change at the system level. The Jerome H. Grossman M.D. Graduate Fellowship, made possible by a generous gift from the Grossman Family, honors the life and legacy of Dr. Grossman, who dedicated his career to strengthening health care delivery in the United States. The Fellowship supports talented physicians who share Dr. Grossman’s commitment and sense of urgency to bring meaningful change to the health care system by enabling them to pursue a two-year master’s degree in public policy or public administration (MPP or MPA2) at Harvard Kennedy School. Fellows are awarded full tuition, fees, and a living stipend for two years, as well as support to carry out summer internships. They are invited to participate in symposia, workshops, and other activities at Harvard that explore health care policy. Grossman fellows are selected through a competitive process on the basis of commitment to shaping health care delivery policy in the United States. First preference is given to licensed physicians, although talented candidates who are concurrently pursing an M.D. may also be considered.

The Littauer Mid-Career Master in Public Administration Program at the Kennedy School
http://www.hks.harvard.edu/degrees/masters/mc-mpa

The one-year Mid-Career Master in Public Administration (MC/MPA) is an intensive 8-credit program that enhances the knowledge and skills of established, high-performing professionals who are looking to move up in their public service careers or transition from the private sector to leadership positions in the public or nonprofit sectors. As part of the program, students also enroll in the five-week Mid-Career Summer Program designed exclusively for mid-career professionals to build and renew important skills before beginning classes in the fall.

Rappaport Public Policy Fellowship
http://www.hks.harvard.edu/centers/rappaport/student-opportunities/public-policy-summer-fellowship

The Rappaport Institute for Greater Boston encourages graduate students to spend part of their careers in public service through a paid, 10-week summer internship in key state and local agencies in the Greater Boston area. Fellows, who represent all graduate schools in Greater Boston, participate in a weekly seminar series with leading practitioners and scholars and receive a $7000 stipend for the summer. The fellowship program is a key component of The Rappaport
Institute, which aims to improve the governance of Greater Boston by promoting emerging leaders, stimulating informed discussion, and producing new ideas. In previous years, fellows have worked on a diverse range of projects that include: school reform plans, environmental risk assessment, public-private partnerships, community development projects, performance-management systems, racial bias in the juvenile justice system, health coverage for foster children, and reduction plans for greenhouse gases.

Institute for Community Inclusion

Barbara Wilensky Gopen Memorial Fellowship
http://www.communityinclusion.org/doc.php?doc_id=89&type=project&id=37

The Gopen Fellowship is a one year, part-time work and learning opportunity for an individual with a developmental disability. Massachusetts residents with developmental disabilities who have finished school are eligible to apply. The Gopen Fellow works primarily at the Institute for Community Inclusion (ICI) in Boston, and occasionally at the Massachusetts Developmental Disabilities Council (MDDC) in Quincy.

Rutgers University

Project L/EARN
http://www.ihhcpar.rutgers.edu/projectlearn/howtoapply.asp

The Institute for Health, Health Care Policy, and Aging Research offers Project L/EARN, an exciting program designed to increase graduate school enrollment among students from groups that are traditionally under-represented in health-related graduate programs, such as students from economically disadvantaged communities; first-generation college-attendees; African-American, Latino, Native American, and Pacific Islanders; those with disabilities; and students with strong interests in health disparities.

State University of NY, Albany, Center for Women in Government

Fellowship on Women and Public Policy
http://www.albany.edu/womeningov/programs/fwpp.shtml

Fellows work in their placement organization 30 hours a week, for a six month period from January through June. Your organization gets the benefit of a full-time staff person with no commitment to the Fellow beyond the six month time frame. Please Note: All Fellowship placement offices must be located within the Capital District area of New York State. Fellows are highly skilled, graduate students who possess a minimum of 3-5 years of prior work experience. Fellows are supported and coached by CWGCS staff throughout their placement; if an issue arises CWGCS helps to resolve it. The Fellowship program is funded through MOU's with placement agencies. The overall cost of hosting a Fellow is significantly less than hiring a staff member.
Public Policy and International Affairs (PPIA) Fellowship Program
http://www.ppiaprogram.org/programs/

The goal of the PPIA Fellowship Program is to help students achieve a Master’s or joint degree, typically in public policy, public administration, international affairs or a related field. The organization does this through the intensive study provided by participation in a Junior Summer Institute (JSI), through partnerships with universities across the country, and through an alumni network that provides opportunities to connect with nearly 4000 individuals who share the same interest in public service. Each year, PPIA seeks out high-potential undergraduate students from universities across the country to participate in an intensive seven-week Junior Summer Institute (JSI) before their senior year. During their program, fellows are equipped with the knowledge and skills they will need to succeed in graduate school and ultimately, in influential roles serving the public good. Once a student has successfully completed their JSI, they join an alumni network of nearly 4,000 leaders. In addition to the opportunities that this network provides for mentoring and career development, our alumni network has the opportunity to receive financial support for their graduate school education if they attend one of the programs in our Graduate School Consortium.

Global Women’s Health Fellowship
Internet:http://www.brighamandwomens.org/Departments_and_Services/womenshealth/connors center/GWH/default.aspx?sub=2

The purpose of the fellowship is to promote educational initiatives and research pertinent to the advancement of Global Women’s Health (GWH) through development of academic research and leadership skills in global medicine, disaster and humanitarian response, war medicine, and areas specific to women’s health including reproductive health and gender-based violence. This two-year program is committed to serve as a platform for collaborative global health work with governmental, non-governmental, and outside institutions in order to meet this end.
The fellowship takes a comprehensive approach to women's health. It includes health issues unique to women (e.g. reproductive health and family planning, female genital cutting, breast and cervical cancer); areas where women experience disproportionate health impact (e.g. cancer, cardiovascular disease, respiratory disease); and health issues where women experience a particular disadvantage based on gender inequalities and other social determinants (e.g. HIV and AIDS, displacement due to war and disaster).

**Coro Fellows Programs in Public Affairs**

Coro Fellows Programs in Public Affairs
CORO NATIONAL OFFICE
Kansas City, MO 64111
http://www.coro.org

**Coro Fellows Program**
http://www.corofellowship.org/

The Coro Fellowship uses the city as a classroom to train the next generation of change makers. Today’s complex urban environments present constantly evolving challenges and opportunities, creating an increasing need for versatile leaders with the ability to forge connections and lead across the non-profit, business and government sectors. Competitively selected applicants will join an intimate cohort of 12 participants for the nine-month program, with each cohort encompassing a wide range of communities, interests, ideologies and experiences.

**Families USA – Wellstone Fellowship for Social Justice**

Families USA – Wellstone Fellowship for Social Justice
Washington DC 20005
Email: info@familiesusa.org

**The Villers Fellowship for Health Care Justice**
https://www.college.columbia.edu/students/fellowships/catalog/villers-fellowships-health-care-justice

The Villers Fellowship for Health Care Justice was created in 2005 by Philippe Villers, founder and President of Families USA, to inspire and develop the next generation of health care justice leaders. The goal of the Villers Fellowship program is three-fold: To develop a network of young leaders who share a passion for social and health care justice; To inspire Villers Fellows to continue working for health care justice throughout their lives; To help achieve Families USA’s goal of guaranteed, high-quality, affordable health care for all of us. During their year-long tenure, Villers Fellows work on Medicaid and enrollment policy issues and develop an understanding of the federal legislative and regulatory process. They will also be exposed to different advocacy strategies, including producing analytic reports, disseminating effective messages through the media, successful coalition building, and e-advocacy techniques.
The Wellstone Fellowship for Social Justice
https://www.college.columbia.edu/students/fellowships/catalog/wellstone-fellowships-social-justice

The Wellstone Fellow’s primary responsibilities include drafting talking points, blogs, fact sheets, and other publications, as well as developing content for the Families USA website and email lists that promotes health equity and the reduction and elimination of disparities in health and health care. During the year, the fellow will learn about health reform implementation, health equity, the private insurance market, health system improvement, and other important health policy issues. At the same time, the Wellstone Fellow will develop an understanding of the tactics and strategies used in state-based consumer health advocacy organizations.

National Academics

Christine Mirzayan Science & Technology Policy Graduate Fellowship Program
http://sites.nationalacademies.org/PGA/policyfellows/PGA_044687

The Christine Mirzayan Science & Technology Policy Graduate Fellowship Program, now in its 18th year, is a full-time hands-on training and educational program that provides early career individuals with the opportunity to spend 12 weeks at the National Academies of Sciences, Engineering, and Medicine in Washington, DC learning about science and technology policy and the role that scientists and engineers play in advising the nation. Each year, applicants from around the world become part of an Academies' committee, board, or unit where they are assigned to a mentor and learn about the world of science and technology policy. An immersive experience, the program is designed to broaden fellows’ appreciation of employment opportunities outside academia and leave them with both a firm grasp of the important and dynamic role of science and technology in decision-making and a better understanding of the role that they can play in strengthening the science and technology enterprise for the betterment of mankind. Alumni of the program hold positions in Congressional committees such as the House Science and Technology Committee and at federal agencies such as the U.S. Department of State, National Institutes of Health, National Science Foundation, Environmental Protection Agency, United States Agency for International Development, Department of Defense, and Department of Energy. They also work in foreign governments, in international institutions such as the European Union and World Bank, in universities, and in the private sector.

National Library of Medicine

Associate Fellowship Program
http://www.nlm.nih.gov/about/training/associate/proginfo.html

The National Library of Medicine Associate Fellowship is: A one-year residency program (with an optional second year) for recent library science graduates interested in a career in health sciences librarianship; A program combining curriculum and project work; Located at the
National Library of Medicine on the campus of the National Institutes of Health in Bethesda, Maryland. The Associate Fellowship provides knowledge and skills in project work ranging from: Data analysis of programs and services such as extramural grants, indexed journal articles, controlled vocabularies, datasets, and customer inquiries; Creation of online tutorials and educational awareness videos; Social media outreach; And more, including legislative tracking, web site enhancement, disaster information outreach studies, and review of next generation discovery interfaces. The Associate Fellowship offers opportunities for professional development through: Participation in lectures, exercises, conferences, short and extended visits to other health sciences libraries; Workshops on work style, resume review, negotiation, and presentation skills; Mentorship from a program coordinator and NLM staff who serve as preceptors.

**RAND Postdoctoral Training Program in the Study of Aging**

RAND Postdoctoral Training Program in the Study of Aging  
Santa Monica, CA 90407-2138

**RAND Postdoctoral Training Program in the Study of Aging**  
http://rand.org/labor/fellows/aging.html

The RAND Postdoctoral Training Program in the Study of Aging enables outstanding junior scholars in demographic and aging research to sharpen their analytic skills, learn to communicate research results effectively, and advance their research agenda. Housed within RAND Labor and Population, the program blends formal and informal training and extensive collaboration with distinguished researchers in a variety of disciplines. Fellowships are for one year, renewable for a second. Each fellow receives a competitive annual stipend, travel stipend and health insurance. Fellows must be U.S. citizens or permanent residents, and must have completed a Ph.D. (or its equivalent) in a relevant discipline before they begin the program. The RAND Fellows program is open to new scholars in the field of demographic and aging research, as well as individuals who already have research experience on these topics. For example, in some cases, fellows are on leave from an academic position so they can engage in research and writing full time, and extend their research agenda and funding base. The Program gives Fellows a great opportunity to jump-start their research careers. After completing the program, RAND Fellows have taken positions at the University of Wisconsin at Madison, University of Virginia, University of North Carolina at Chapel Hill, the University of Minnesota, Johns Hopkins University, SUNY Stony Brook, the World Bank, and CDC, for example.

**Native American Awards Program – Community Scholars**
The Native American Awards Community Scholar falls within the Native American Awards Program which supports applicants, who are formally or informally affiliated with a Native American community or tribe, to visit the Institution to undertake projects on a Native American subject and utilize the Native American resources of the Institution. One of the goals of the program is for the Community Scholars to take the knowledge they gain through their research and share it with their community.

IRP Graduate Research Fellows Program
http://www.irp.wisc.edu/initiatives/igrfp.htm

The IRP Graduate Research Fellows (GRF) Program is conducted for Ph.D. students in the social sciences (e.g., Economics, Social Work, Sociology, Political Science and any related disciplines) who have an interest in poverty research and expect to complete a related dissertation. In selecting fellows, preference is given to those who receive financial support through IRP and/or are working with an IRP affiliate. The training seminar strives, in an interdisciplinary setting, to: (1) enrich students’ understanding of important research topics and design/methodological issues and to expand their research skill set; (2) further develop students’ ability to critically evaluate their own research and that of their peers and other researchers; and (3) assist students in preparing for the dissemination of their research. These goals are achieved through meetings with graduate student peers and a faculty director (about 14 times each year), attendance at research presentations and/or conferences, and presentations of students’ own work in a seminar or conference setting. The size of the program is kept small enough to promote meaningful group discussion but large enough to attain good representation from the various disciplines noted above.

General Poverty Researchers from Underrepresented Groups
http://www.irp.wisc.edu/initiatives/vscholars.htm

The Institute for Research on Poverty has three programs to facilitate interaction among a broad range of social science scholars: the first is targeted at U.S.-based scholars from underrepresented racial and ethnic groups and includes IRP financial support; the second is targeted at food assistance and food insecurity researchers and includes support from IRP and the Economic Research Service of the U.S. Department of Agriculture; and the third is open to visitors working on poverty-related research who have their own funding, for limited or longer-term stays.
Congressional Healthcare Policy Fellows Program
http://www.pharmacy.vcu.edu/programs/post_grad/publicpolicy/

The Program provides a unique healthcare policy learning experience that allows the Fellow to make practical contributions to the effective use of scientific and pharmaceutical knowledge in government decision making. The Fellow will be actively mentored during their development of legislative evaluation and policy development skills, and research and writing skills as they integrate practical policy experience with theory. The Fellow will be expected to undertake a wide array of responsibilities in the Congressional office they serve including researching and writing briefs on healthcare issues, assisting with policy decisions, drafting memoranda, planning, organizing and contributing to the management objectives of the office.
